September 25, 2013

To: Fairbanks Natural Gas

The Northern Regional Land Office has completed its review of your proposed upgrades to the section line easement along the common section line of Sections 12 and 13, T. 1 S., R. 2 W., F.M.

We have determined that the portion of the property that crosses the Chena River along the section line as indicated in the application for ADL 419983 is owned by the State of Alaska. AS 19.10.010 allows development of a section line easement for access. The project you are considering appears to be an acceptable secondary use for which section line easements were created. Before you proceed with any development:

- You must accurately locate the boundaries of the section line easement within a survey;
- You must secure all other required local, state, and/or federal authorizations;
- You must plan the development of this gas line in a reasonable manner commensurate with the scope of your project. If future road development occurs in this area, it is your responsibility to move your improvements to accommodate this development.

If you have any questions, please contact me at 907-451-2777.

Sincerely,

A handwritten signature in black ink, appearing to read "AJ Wait".
