in the width of the right-of-way if he finds, and records the reasons for his finding, that in his judgment a wider right-of-way is necessary for operation and maintenance of the road, or to protect the environment or public safety.

3. Upon completion of construction of the road, the State will file a map of definite location with the Secretary of the Interior.
4. The State shall comply with the Stipulations attached as Exhibit "A" to the aforesaid Cooperative Agreement, dated January 8, 1974.
5. To the extent practicable, the State's contractors shall not damage any fish, wildlife, or biotic resources in the general area of the right-of-way upon which persons living in the area rely for subsistence purposes. The State's contractors will comply promptly with all requirements and orders of the Secretary of the Interior to protect the interests of persons living in the general area of the right-of-way who rely on the fish, wildlife and biotic resources of the area for subsistence purposes. For the purposes of Stipulation 2.3.1 of the aforementioned Stipulations, this Paragraph shall be deemed to be a part of the said Stipulations.
6. Any written notice that may be given by either the United States to the State or by the State to the United States in connection with this grant shall be deemed to have been delivered to and received by the addressee when the notice has been delivered during normal business hours by messenger or by means of registered or certified United States mail, return receipt requested, to:
