ALASKA ROAD COMMISSION

ALASKA RESOURCES LIBRARY
U.S. Department of the Interior

SUMMARY OF ACTIVITIES IN FISCAL YEAR 1948.

FUNDS

Funds for the prosecution of the work of the Alaska Road Commission were provided from five sources, as follows:

- (1) Appropriation by the Federal Government to the Department of the Interior for expenditure in conformity with Act of Congress approved January 27, 1905, and amendments thereto.
- (2) From a portion of the Alaska Fund, a fund covered into the Federal Treasury but derived entirely from special taxes imposed by the Federal Government upon various industries in the Territory.
- (3) Funds appropriated by the Territorial Legislature and deposited with the Treasurer of the United States for expenditure on construction, repair and maintenance of roads, bridges, ferries, trails and related works in the Territory as provided by Act of Congress approved June 30, 1921. These funds are expended upon projects designated by the Territorial Board of Road Commissioners.
- (4) Money allotted by the National Park Service and expended under its direction entirely within the boundaries of national parks and monuments.
- (5) Contributions by individuals, companies and corporations.

For the fiscal year 1948, the following funds were made available from the above sources:

Item 1	\$4,000,000
Item 2	130,000
Item 3	173,928
Item 4	55,850
Item 5	5,881

For the fiscal year 1949 the Interior Department Appropriation Act provides \$1,841,300 under item one for maintenance of roads, bridges and trails, \$2,440,000 for new road construction, \$1,752,000 for road improvement, \$3,000,000 for asphalt surfacing on the Glenn and Richardson Highways, \$1,009,100 for surveys and \$400,000 for construction of shops. Under item two, \$100,000 is provided for maintenance of roads. Under item four the National Park Service has allotted \$43,520 and it is estimated that \$350,000 will be available under items three and five.

In addition to the above, contract authorization for continuing asphalt surfacing on the Glenn, Richardson and Alaska Highways and reconstruction of the Tok Cutoff, totaling \$13,904,000 was provided in the appropriation act.

SUMMARY OF ALL EXPENDITURES TO JUNE 30, 1948

The Commission has expended the following funds since the beginning of road trail development in the Territory:

<u>Fiscal Year</u>	<u>Congressional Appropriations</u>	<u>Alaska Fund</u>	<u>Other Funds</u>	<u>Total</u>
1930-1930	\$10,433,824.29	\$3,566,870.24 (a)	\$1,984,826.03	\$15,935,521.16
31-1940	5,538,899.87	1,489,222.72	1,904,923.34	8,933,045.93
34-1939 (NIRA)	1,595,545.09	---	150,000.00	1,745,545.09
35-1939 (ERA)	1,119,447.60	---	---	1,119,447.60
31	794,909.55	144,973.15	273,112.90	1,212,995.60
32	1,892,925.33	153,421.65	148,255.07	2,194,602.05
33	2,795,743.82	112,938.41	47,381.34	2,956,063.57
34	2,366,075.32	181,748.24	83,651.54	2,631,475.10
35	2,188,304.06	116,503.16	214,936.51	2,519,793.73
36	2,257,909.74	119,615.18	179,392.09	2,556,917.01
37	3,776,113.24	179,677.52	253,602.59	4,209,593.35
38	2,926,842.28	29,462.08	111,136.87	4,077,441.23
TALS.....	\$38,696,540.19	\$6,094,432.95	\$5,351,468.28	\$50,142,441.42

) Includes \$17,052.23, U. S. Treasury adjustment in 1912.

"Other Funds" in the foregoing table include the following expenditures from other appropriations:

<u>Fiscal Year</u>	<u>Increase of Compensation acts</u>	<u>Quartermaster General</u>	<u>Funds Contributed</u>	<u>National Park Service</u>
19 - 1930	\$95,076.45	\$4,694.80	\$1,453,212.53	\$431,842.25
31 - 1940	---	3,262.30	1,016,827.26	884,833.78
34 - 1936 (NIRA)	---	---	---	150,000.00
31	---	---	222,205.86	50,907.04
32	---	---	116,664.22	31,590.85
33	---	---	41,362.13	6,019.21
34	---	---	73,662.54	9,989.00
35	---	---	199,544.82	15,441.69
36	---	---	154,112.31	25,279.78
37	---	---	167,900.50	85,902.09
38	---	---	47,697.43	63,439.44
TALS.....	\$95,076.45 (a)	\$7,957.10 (b)	3,493,189.60	1,755,245.13 (c)

) Includes refunds of \$16.95.

) Includes refunds of \$10,571.43 but is exclusive of reversions to Treasury (Economy Legislation) of \$302.39.

) Includes refunds of \$20.94 but is exclusive of reversions to Treasury of \$48.74, and Economy Legislation \$3,506.39.

al Congressional appropriations.....	\$56,644,908.02
- Reversions to Treasury.....	83,167.72
Reversions to Treasury (Economy Legislation).....	47,094.50
Transfer to U.S. Engineer Department (Lowell Creek Flood Control).....	417.21

payments.....	<u>\$ 14,319.75</u>
	<u>\$167,287.08</u>
Total net expenditures.....	<u>\$6,094,432.95</u>

By provisions of Act of Congress approved May 9, 1935 (Indefinite Appropriation Act) the Alaska Fund will henceforth be expended upon basis of Congressional authorization.

use expenditures are summarized as follows:

Federal Appropriations

fessional appropriations.....	\$ 38,696,540.19
Alaska Fund 1905-1948.....	6,077,380.72
S. Treasury adjustment, 1912.....	17,052.23
crease of compensation acts, 1918-1925.....	95,076.45
ntermaster General, 1925-1932.....	7,957.10
ational Park Service, 1925-1946.....	<u>1,755,245.33</u>
Total.....	\$ 46,649,251.82

CONTRIBUTED FUNDS

Territory of Alaska, 1920-1948.....	\$3,238,552.88
Miscellaneous.....	<u>251,636.72</u>
TOTAL.....	<u>\$3,493,189.60</u>
GRANDE TOTAL.....	250,142,441.42

In addition to the above funds, disbursed through the United States Treasury, the Commission has supervised the expenditure of the following funds, granted by other agencies, for road and trail development:

Editorial funds and forest revenues prior to 1921.....	624,239.64
Editorial divisional commissioners, 1921-1929.....	194,939.60
Lord Paninsular Tramway, 1923.....	24,014.00
Evana tramway, 1924.....	6,425.00
Mag Portage survey, 1925.....	312.72
Miscellaneous.....	<u>22,349.50</u>
TOTAL.....	<u>932,280.46</u>

TERRITORIAL FUNDS

The Territorial Legislature biennially appropriates funds for the construction and maintenance of roads and trails. A portion of these funds is allocated to projects by the Territorial Road Board and is expended under the direction of the Alaska Road Commission.

For the working season of 1948 (fiscal year 1949), the Territorial Board has allotted to the Alaska Road Commission the following amounts:

Cooperative road projects....	\$317,000
Airfields.....	33,000
Total	<u>\$350,000</u>

MATERIALS, SUPPLIES AND EQUIPMENT

Alaskan products are preferably used in the work when the price and quality compare favorably with the cost of the same items landed at warehouses in Alaska.

All supplies not procured in Alaska are purchased for the Commission by the Mile Regional Office of the Bureau of Federal Supply. The cost of this service is shared by the individual bureaus on a pro rata basis. The share for the Alaska Road Commission averages about 5 per cent of the invoice price of items thus purchased.

Work is performed by mechanical equipment to every extent deemed advantageous. The Commission is now equipped to handle construction and maintenance work within present limits of appropriations except for replacement of unserviceable or obsolete equipment. Due to difficulty in obtaining delivery of new road construction equipment, many machines have been continued in service beyond the period

of economical life and will be retired as rapidly as replacements are available. During the fiscal year just closed the following pieces of mechanical equipment were obtained, part of which was used equipment secured from the Surplus Property Office by transfer of funds:

3 Cranes, track mounted w/shovel attachment
1 Heater, tank car
3 Light Plants, 5 to 10 KW
4 Motor Graders, large
1 Plow, snow, rotary, truck-mounted
1 Scraper, 6 cubic yards
13 Scrapers, 14 cubic yards
2 Shovels, diesel, 3/4 cubic yards
2 Tractors, Crawler, 35 h.p. with dozer
4 " " 55 " " "
2 " " 70 " " "
3 " " 110 " " "
3 Tractors, Wheeled, with loader attachment
3 " " , 80 h.p.
3 Trailers, dump, for above, 10 cubic yards
1 Trailer, Semi, 25-ton capacity
3 Trucks, Cargo, rated 16,000 pounds
41 Trucks, Dump, 3 cubic yards
1 Truck, Tractor
8 trucks, coupe pickup

ORGANIZATION

All labor is ordinarily secured from among local residents. A number of workers were shipped from Juneau to Valdez, Anchorage, and Fairbanks. The class of labor as a whole has improved but is still below average in efficiency. The present trend indicates that workers will not be so hard to secure during the present road construction season, as many people are coming to Alaska seeking work, including a number of veterans.

At the Juneau headquarters, located in the Federal and Territorial Building, is the general office staff consisting of a Chief Engineer, Assistant Chief Engineer, and Chief Clerk, with necessary assistants.

District offices are located at Valdez, Anchorage, Fairbanks, and Nome. The work near or adjacent to Juneau, and known as the "Southeastern District", is supervised from the headquarters office.

The organization, with its widespread activities throughout the Territory, is equipped to handle many phases of construction work and in many instances has lent itself to the supervision of construction work of various kinds for other branches of the Federal Government, and for the Territorial Government. This consolidation of work has doubtless saved considerable public expenditures particularly on small projects in isolated sections. Especially is this true of small road projects undertaken for the Territorial Government which are not included in the general road program of the Commission.

CONSTRUCTION METHODS

Although standard construction and maintenance methods are employed in Alaska so far as practicable, it is necessary to vary therefrom in some instances because of special physical and climatic conditions.

The frozen condition of the subsoil and the constant thawing during summer require special precautions for drainage. Intercepting ditches on the uphill side of the road are frequently necessary and after the vegetation has been stripped from the roadway the ground must be allowed to thaw, settle, and consolidate for several months before completing the grading and applying the surfacing. Frequently one or more seasons are required for such drainage and consolidation and in order to maintain traffic during this period corduroy must be used. Sloughing banks, due to thawing of the subsurface ice, frequently cause slides which cover and block the roads.

Special methods of revetment and stream control must be used to withstand the destructive effects of sudden and frequent freshets and washouts that result from heavy rains in the mountains or the release of impounded waters by breaks in glaciers. The most suitable type of revetment for this purpose is built of brush weighted down with stone in bundles wrapped in wire mesh to prevent its washing away.

Gravel for road surfacing is generally available within reasonable hauling distance. Surfacing is necessary for all roads which are used by automobiles. Military operations in the Territory require some form of stabilization of the gravel surface on the main highways and a program to provide this will begin in fiscal year 1949.

Bridges are built of native or imported timber, or steel, depending on their importance and location. Fir has been found to be the most suitable material for stress members in timber bridges but local timber is used for a part of these structures. Metal culverts are used to replace culverts of native timber ordinarily used on new construction.

OPERATIONS DURING THE FISCAL YEAR

The work in the past fiscal year, in addition to maintenance, included the continuation of the construction on three new road projects of major importance. Reconstruction on the Richardson Highway was continued and construction of the Fairbanks-Livengood road was started. Some new mileage constructed consisted of short extensions or branch roads to existing routes and extension of new construction on projects already underway. The latter work was partly financed from funds contributed by the Territory and others.

The Richardson Highway was open from Valdez to Gulkana from April 29 to November 3; from Gulkana to Fairbanks from May 18 to October 20; the section from Fairbanks to the junction with the Alaska Military Highway, mile 100 from Fairbanks, was maintained in service throughout the year and was the Alaska Military. The Glenn Highway was kept open the entire year, and the

Tok Cutoff from Gulkana on the Richardson Highway to Tok Junction on the Alaska Highway was maintained for winter travel. This permitted traffic during the winter between Fairbanks and Anchorage and permitted truckers in over the Alaska Highway to proceed to Anchorage.

Work of reconstruction on the Richardson Highway includes the following:

Completed construction miles 4 through 5 and mile 6.5 to 7.5. Completed reconstruction started last year of miles 25 through 29 and miles 183 through 193. Reconstructed miles 17 to 19; widened miles 85 to 91, and partially completed reconstruction miles 195.5 to 198.4, relocation mile 198.8 to mile 200.7, widening mile 206.5 to 207.5 and 209 to 213. Miles 75 through 97 were resurfaced with crushed gravel. Several additional permanent buildings for maintenance camps were erected from transferred buildings secured from the Army.

New construction was continued on the road to connect the existing Forest Highway from Seward to the Forest boundary with settlements at Kenai and Homer. Grading was advanced 47.0 miles during this year and 13.7 miles were surfaced. Total to date; 60.2 miles graded, 24.8 miles surfaced. A 300-foot steel span bridge with 48 feet of trestle approach was erected over the Kenai River. The road was passable throughout the year for traffic between the Forest Boundary and Kenai. Fabricated steel for a 250-foot span over the Kasloof River was delivered at the site. Work on this new road is in progress.

New construction continued on the road from the Alaska Highway into the Forty Mile mining district. Grading was advanced 24 miles and 21 miles were surfaced. Total to date; 35 miles graded, 32 miles surfaced. Work on this project is in progress.

New construction was started on a road south from Anchorage to Potter, 10.9 miles. This road will serve as a part of the proposed road connection between Seward and Anchorage. Grading was completed over 5.7 miles and 2.6 miles were surfaced.

Reconstruction of the road from Fairbanks to Livengood was started. The work involves regrading of the existing average 18-foot width road to uniform 24-foot width, including minor improvements in alignment and resurfacing. The distance is 71 miles. During the year 32 miles were regraded and widened and 16 miles surfaced.

Two relocations, totaling 2.1 miles, for improvement in alignment on the Anchorage-Palmer road were graded. Steel was purchased for one 180-foot and one 125-foot span, which will be erected as soon as received.

Construction was started on a 60' x 136' steel and concrete shop building at Anchorage. Work under the contract for the building was 60% complete at the end of the fiscal year.

Surveys were started for road locations between the Richardson Highway at Paxons and Mount McKinley National Park, and between Livengood and Wiseman. Line was located over 45.4 miles of the former and 24 miles of the latter route.

Construction of the Skagway-Dyea road was advanced 0.3 miles through rock to mile 5.9. A 200-foot steel span bridge was erected over the Dyea River.

In addition to the above, 14.9 miles of new road to serve new homesteads were constructed consisting entirely of short extensions or branches to existing roads. These projects varied from $\frac{1}{2}$ mile to 3 miles in length.

New Construction: 92.1 miles of road of which 43.1 miles were surfaced, 5 miles trail, 364 linear feet of standard wooden trestle bridges 20 feet wide, 172 linear feet of timber trestle bridges less than 20 feet, one 300-foot steel span 20 feet wide, one 200-foot steel span 14 feet wide, and 3720 linear feet of metal culverts.

Improvements: 55.3 miles of road regraded and widened, 52.2 miles of road resurfaced, 6756 linear feet of metal culverts installed, and 54 linear feet steel beam span, 14 feet wide, erected as replacement of timber bridges.

Maintenance: 2,521.5 miles of road, 80 miles of tramway, 116.5 miles of sled road, 123 miles of permanent trail and 106 miles of temporary flagged trail.

The total mileage of all routes as of June 30, 1948 is as follows:

	Sled Road	Road	Trail	Flagged Trail	Grand Total
June 30, 1947	2,784.8	1,227.4	4,110.8	102.0	8,225.0
Fiscal year 1948					
New mileage.....	92.1	---	5.0	4.0	101.1
Reclassified, abandoned and transferred.....	-5.6	-87.5	---	---	-93.1
Total.....(a)	2,871.3	1,139.9	4,115.8	106.0	8,233.0
No work of either maintenance or improvement during fiscal year 1948:	121.9	1,023.4	3,992.8	---	5,136.1

(a) Includes 80 miles tram road.

The above mileage of roads consists of the following systems:

Principal Connected Road System

	<u>Miles</u>
Richardson Highway	365
Glenn Highway	189
Steese Highway	162
Tok Cutoff	136
Alaska Highway and Branches	<u>210</u>
	1,062

Local System

Nabnuna Branch	44
Feeder Roads, Richardson Highway	72
McCarthy Road System	31
Feeder Roads to Steese Highway	134
Livengood Road and Branches	87
Anchorage Local Roads	62
Fairbanks Local Roads	52
Pulmer System	193
Nooré System	168
Seward Peninsula Mine Roads	94
Seward Peninsula Tram Road	60
Takotna System	71
Flat System	36
Manley Hot Springs System	48
Ruby System	66
Haines System	65
Xenai Peninsula System	98
Feeders to the Alaska Railroad	94
Eagle System	32
Iliamna System	27
Forty Mile Road System	53
Isolated Roads connecting with river or ocean transportation	106
Mount McKinley Park Roads	<u>91</u>
	1,809
Total.. .	2,871

PROPOSED OPERATIONS

In addition to \$1,841,300 from appropriated funds for maintenance, it is estimated there will be available for maintenance from the "Alaska Fund" and Territorial appropriation \$200,000 for the fiscal year ending June 30, 1949. With these funds normal maintenance of the existing system will be performed.

For the fiscal year 1949 the following funds are available for new work:

Fairbanks-Livengood	Continuation of reconstruction started in 1948,.....	\$ 252,000
Kenai Lake-Homer	Continuation of new construction... .	1,000,000
Eagle-Forty Mile-Alaska Highway	Continuation of new construction.....	800,000
Anchorage-Potter	Continuation of new construction... .	140,000
Farm Roads, Palmer, Fairbanks, and Homer	New construction	200,000
Richardson Highway	Asphalt surfacing.....	2,250,000
Glenn Highway	Asphalt surfacing.....	750,000
Tok Cutoff	Reconstruction.....	1,500,000
Livengood-Wiseman	New Construction.....	300,000
Turnagain Arm Road	New Construction.....	<u>11,370,000</u>
	Total reconstruction and new construction of roads.....	14 \$18,562,000
Construction repair shop and warehouse, Anchorage.....	200,000	
Construction repair shop, Fairbanks.....	200,000	

SURVEYS

Livengood-Wiseman.	5,100
Fairbanks-Chena Hot Springs.	105,000
Richardson Highway for asphalt surfacing	347,000
Glenn Highway for asphalt surfacing.	183,000
Alaska Highway for asphalt surfacing	203,000
Haines to Boundary for asphalt surfacing	41,000
Tok Cutoff for asphalt surfacing	<u>125,000</u>

Total for Surveys..... \$1,009,100

In addition to the above appropriations, contract authorization was received for the following:

Richardson Highway, asphalt surfacing.....	\$3,854,000
Glenn Highway, asphalt surfacing.....	4,190,000
Alaska Highway, asphalt surfacing.....	2,500,000
Tok Cutoff, reconstruction.....	1,900,000
Livengood-Wiseman, new construction.....	1,460,000
Turnagain Arm road, new construction.....	<u>4,000,000</u>

Total contract authorization....\$17,904,000

With the above funds, work will be continued on the Kenai Lake-Homer and. Completed grading will be extended 40 miles and 50 miles surfaced. On the Eagle-Forty Mile-Alaska Highway road, grading and surfacing will be completed for an additional 35 miles. The Anchorage-Potter road will be completed. Reconstruction of the Fairbanks-Livengood road will be completed except for final surfacing of 30 miles. Work will be placed under contract for the construction of 50 miles of road to connect the Seward and Anchorage road systems by way of Turnagain Arm. It is estimated that 20 miles will be completed. A number of short, new farm roads totaling 20 miles will be constructed.

As rapidly as necessary data can be obtained, contracts will be awarded for surfacing on the Glenn, Richardson and Alaska Highways. It is planned to let contracts for 183 miles on the Glenn Highway, 191 miles on the Richardson Highway and 93 miles on the Alaska Highway.

Reconstruction of the Tok Cutoff to a uniform standard 26-foot width will be extended over 60 miles during the year. Construction will be started on the section of the Livengood-Wiseman road between Livengood and the Yukon River.

A repair shop and warehouse will be completed at Anchorage and work will be started on a repair shop at Fairbanks.

Location surveys will be extended to the Yukon from Livengood and for 40 miles from Fairbanks toward Chena Hot Springs. Surveys to obtain the necessary information to prepare specifications and invitations for bids for asphalt surfacing of the Glenn, Richardson and Alaska Highways will be carried out as rapidly as qualified personnel can be obtained.

RECOMMENDATIONS

For the fiscal year ending June 30, 1950, an appropriation of \$25,449,200 is recommended in addition to funds available from other sources. The funds recommended are for the following work:

EXPLANATION:

718 Miles principal roads, year-round maintenance, \$1,200 per mile.....	\$261,600
350 Miles local and feeder roads, year-round maintenance, \$800 per mile.....	280,000
344 Miles principal roads, summer maintenance only, \$700 per mile.....	240,800
1,368 Miles local systems, summer maintenance only \$500 per mile.....	<u>684,000</u>
	<u>\$2,066,400</u>

is estimated \$100,000 from the Alaska Fund and \$100,000 from
territorial contributions will be available for maintenance -200,000

to be appropriated.....\$1,866,400

EXPLANATION:

Project	Length	Estimated Total Cost	Appr. to 1949	Contract Authorization 1949	Proposed Estimate for 1950 Appr.	Proposed Contract Authorization 1950

The funds requested for maintenance will provide for adequate normal maintenance of the existing system. Costs in Alaska have more than doubled since 1941 and the amount requested will be required as the mileage to be maintained has increased and traffic on the main roads continues to be heavy.

Continuation of work on new roads and asphalt surfacing of the trunk system is proposed as indicated. Appropriations for 1949 will be obligated during the fiscal year and the amounts recommended are required to continue work already started and to begin work on other essential projects.

Recommendation is made for funds for definite location surveys of proposed new roads. Such surveys are necessary in order to prepare estimates of costs on new projects.

FORTY-FOUR YEARS' SERVICE

With the period covered by this report the Alaska Road Commission includes its forty-four year of service. The work accomplished consists of the construction and maintenance of 2452.7 miles of road and tram road, or part of which is suitable for automobiles in all summer weather,

2871.3

1,149.2 miles of winter sled road, 4,115.8 miles of trail and 106 miles of flagged trail. The total costs to the end of the fiscal year are \$47,614,151.37 of which \$24,266,233.40 was for new work and \$23,347,917.77 was for maintenance and improvement. The total expenditures to date are \$50,142,441.42 of which \$40,554,818.87 was derived from Federal appropriation acts. The balance, \$9,587,622.55 or 19 per cent of the total expenditures, was obtained from Alaskan sources.

All existing mileage has been maintained and improved, so far as funds have permitted. The present system of roads serves as the basis for future development of overland routes throughout the Territory. This development calls only for additional funds for construction.

A standard cost system is maintained in all districts, from which over a period of years, valuable information can be secured in the preparation of estimates. In the use of such data, however, consideration must be given to the large differences in freight rates, labor costs and climatic conditions in the various sections.

Annual maintenance is estimated as shown above for the various classes and standards of road. For fiscal year 1948 the average cost of maintenance per mile, including minor improvements, was \$645 for all roads on which maintenance was performed. Exceptionally severe flood conditions in the Fairbanks area in the spring of 1948 caused damage to some sections of all roads leading out of Fairbanks, requiring extraordinary repairs.

Due to curtailment of gold mining, expenditures on roads leading to mines, sled roads and trail had been reduced to the minimum. With the end of the war, mining activities have increased and additional maintenance on these roads is now required.

The Richardson Highway, which with the Edgerton Cutoff from Chitina totals 404 miles, is an all-weather road. The first automobile went over this route in 1913, after the route had been used as a pack trail and wagon road for 8 years, but due to lack of funds improvement to a fair standard proceeded slowly. The average cost per mile to June 30, 1948, including all costs for construction and maintenance over the 42 year period of use for the 404 miles, is \$37,281.

The Steese Highway extending from Fairbanks to Circle, a distance of 112 miles, is an all-weather road. Including maintenance, the total cost per mile of this road to June 30, 1948 is \$16,979. This included its life as a sled road from 1906 and partly constructed wagon road beginning in 1908.

The Elliot Highway branches from the Steese Highway at Mile 11 near Fox and extends to Livengood and up Livengood Creek, a total length of 78 miles. Sufficient surfacing has been provided to class it as an all-weather road. Reconstruction to higher standard is now in progress. The total cost per mile including maintenance to June 30, 1948 is \$16,147.

The Mt. McKinley National Park road system started in 1922 is completed except for some proposed gradual improvement. The total cost per mile to date of 91 miles, including maintenance of completed sections since construction, is \$19,590.

The Glenn Highway extending from Palmer to the Richardson Highway is now completed. It has a 24 foot crushed gravel surface with no grades over 8 per cent and no curves over 30 degrees. The total cost per mile to date, including maintenance, on the section from Moose Creek to the Richardson Highway 134.75 miles, is \$25,483.

A consolidated cost statement of all projects follows:
