

T. 8 N., R. 87 W., Seward Meridian, Alaska

Chains

The following field notes describe the monumentation of the survey of the south and east boundaries, and a portion of the subdivisional lines as depicted on the plat of Township 8 North, Range 87 West, Seward Meridian, Alaska.

U.S. Survey No. 13447 was surveyed by Gary D. Kowal, Registered Alaska Land Surveyor No. LS-8856, in 2005, and accepted subsequent to this survey and is depicted on the plat based on the official record.

Township 8 North, Range 88 West, and Township 9 North, Range 86 West, Seward Meridian, Alaska., were surveyed concurrently by Richard R. Bidasolo, Cadastral Surveyor, in 1978.

This survey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1973, the Special Instructions for Group No. 336, Alaska, dated October 17, 1977, approved January 23, 1978, and the memorandum for the Survey Requirements for Subdivision of Township (Protracted vs. Surveyed Section Lines) dated April 15, 2005.

Corner positions and the direction of lines of this survey were determined by Auto-Surveyor methods, utilizing control stations established by the National Geodetic Survey, U.S. Army Corps of Engineers, and Bureau of Land Management. The direction of the lines refers to the true meridian.

Monuments were set at protracted positions based on the official Bureau of Land Management protraction diagrams.

The aluminum triangular markers referred to in the field notes of the survey monumentation are 15 inches long on each side, with fluorescent orange plastic coating attached to 5/8-inch diameter rods extending approximately 2 feet above the ground.

Preliminary Statement

As no on-the-ground survey between the corners was performed, the bearings and distances are omitted from these field notes and shown only on the plat. Corner descriptions are referenced from the corner on the plat to the body of these notes with a letter designator.

A

Point for the cor. of Tps. 7 and 8 N., Rs. 86 and 87 W.

Drive an alum. rod, 9 ft. long, 5/8 in. diam., 8 ft. in the ground, with alum. cap mkd.
