

CROSS COMPARISON OF GREEN TESTIMONY

1999 TESTIMONY

2003 DEPOSITION

<p>Visited the property in 1982 and cleared out the road a bit. TR. 57.</p>	<p>Green first visited the property with Elden Harrild in 1982 and physically drove in a small two wheel drive car to the top where the house now is located. Depo Page 16</p>
<p>This road had not been used in years. Originally it was a native trail. Archaeologists have been up there. The road itself originally had been a trail and then was driven on. My grandfather would often go up there. TR. 59.</p>	<p>In her first visit in 1982, Green was able to transit the trail (marked in green pen) in an automobile to where the cabin is. Depo Page 24-25.</p>
<p>Green went to Art McTaggart and they cleared the old telephone road going into the property. Green went up and took down trees about 4" in diameter. Trees had grown up so you couldn't drive in. Cleared out the trail going to the bluff where the oversight is. TR. 64.</p>	<p>When Green went up there with Elden Harrild in the summer of 1982 she could drive up to where the cabin site is. Depo Page 26. Did not remove any sizable trees in 1982. Clearing was limited to overhanging branches or trees less than 4" in diameter. Depo Page 38-39.</p>
<p>In 1982 we "went up and took down four inch in diameter, about, trees that had grown up in the road so you couldn't drive in. Cleared -- cleared to the side, brush. Cleared out the trail going to the bluff where the oversight is. That sort of thing." TR. 64. Cleared trees in 1982. TR. 380.</p>	<p>First work (1982) was clearing the road wider using an axe and a hand saw. Cleared small pieces under 4". Cut and stacked small trees and had Bill Arrington cut larger trees. Cleared out an area part way and stacked stuff there. Depo Page 17-18</p>
