ANNUAL REPORT OF THE CHIEF OF ENGINEERS, 1921

Extract 🚺

REPORT UPON THE CONSTRUCTION AND MAINTENANCE OF MILITARY AND POST ROADS, BRIDGES, AND TRAILS, ALASKA

> BOARD OF ROAD COMMISSIONERS FOR ALASKA

WASHINGTON GOVERNMENT PRINTING OFFICE 1921

В

REPORT OF CHIEF OF ENGINEERS, U. S. ARMY, 1921.

TERMINAL FACILITIES.

None.

EFFECT OF IMPROVEMENT.

The roads and trails constructed by the board have not only opened up to development nearly all sections of the Territory, but have effected large savings in freight charges. Data collected by the board since 1911 indicate that the annual saving in cost of transportation of freight due to the construction of roads by the board is in excess of \$2,000,000. It is doubtful, however, if anything like that amount of freight would have been transported without the roads, and the indirect loss which would have been occasioned by the restriction on output and development if the roads did not exist can not be estimated.

The use of automobiles is increasing rapidly. Approximately 90 per cent of the traffic on the main wagon roads is handled by motor, which has greatly increased the cost of road maintenance. The use of tractors for drawing freight, particularly on the sled roads of the

interior, is a valuable new development. Recommended modification of project.—None. References to published articles not previously reported.—The Military Engineer, January-February, 1921, pages 1-12, "The Roads of Alaska," by James G. Steese, president, Alaska Road Commission, 9,000 words, illustrated.

PROPOSED OPERATIONS.

In last year's report was set forth a program of road and trail development to meet immediate needs and to cover a period of 10 years. Three classes of road building operations are involved:

(a) Maintenance of existing mileage for the 10-year period_____ \$2,000,000 (b) About 700 miles of new construction largely resulting from im-

- provement to wagon road standard of existing sled roads or 7, 000, 000 trails and maintenance of same through the 10-year period___
- (c) Development roads, the value or location of which is not yet 1,000,000 fixed.

An estimate was submitted for the fiscal year ending June 30. 1922, of \$955,000 to initiate the work. This estimate was based on the following requirements:

- For repair and maintenance of 904 miles of wagon road, Item I. 519 miles of sled road and 678 miles of trail, as per de-tailed statement,¹ necessary to hold existing system and \$370,000 prevent further deterioration______ Item II. For improvement of intermediate sections of routes in-
- cluded in Item I above, necessary to enable existing through routes to be utilized throughout by the same 303, ⁰⁰⁰ class of traffic
- Item III. For new construction necessary to raise the classification of existing routes, provide additional mileage, and for surveys and reconnaissance, 640 miles in order of im-282, ⁰⁰⁰ portance as listed 1___ With

Only \$425,000 was provided by the act of June 30, 1921. this amount, substantial progress is being made in the rehabilitation

Detailed statement omitted.

BOARD OF ROAD COMMISSIONE

of the existing system. Little can be o pressing need for improvement and exte cially in providing urgently needed feede road, now nearing completion, without n priations.

The Government railroad is operating annual deficit of over \$1,000,000, not inc zation charges. When it is completed this \$2,000,000 annually. This board has been vide relief in the way of feeder lines to st endeavored to do to the best of its ability 1 One-third of its expenditures for the c routes immediately tributary to the Goven stantial portion of the remainder on rout will also indirectly contribute traffic. Th on each side of the railroad constitutes o Territory of Alaska. For the board to c other five-sixths of the Territory and to a age into producing districts would be a m posed by specific law.

Of the \$10,000,000 estimated for the nex improvements or new construction neede have been initiated two years ago at the Vigorous efforts should now be made to work in the next five years, or the event creased and development of the Territory

The approaching completion of the Go more liberal coal and oil leasing and water lated activity in Alaska and have been an attitude toward the Territory on the pai ment. In order to handle the entire road greatest eventual economy the following priated each year:

tted.

of the existing system. Little can be done, however, to meet the of the in providing urgently noded for the system, espepressing providing urgently needed feeders to the Government railroad, now nearing completion, without much greater annual appropriations.

The Government railroad is operating its completed sections at an annual deficit of over \$1,000,000, not including interest and amortiation charges. When it is completed this deficit will jump to nearly 22,000,000 annually. This board has been besieged for years to provide relief in the way of feeder lines to stimulate traffic. This it has endeavored to do to the best of its ability from its very limited funds. one-third of its expenditures for the current fiscal year were on routes immediately tributary to the Government railroad, and a substantial portion of the remainder on routes which, when completed, will also indirectly contribute traffic. The country within 100 miles on each side of the railroad constitutes only about one-sixth of the Territory of Alaska. For the board to disregard the claims of the other five-sixths of the Territory and to abandon its extensive mileage into producing districts would be a manifest neglect of duty imposed by specific law.

Of the \$10,000,000 estimated for the next 10 years, \$7,000,000 is for improvements or new construction needed at once. Work should have been initiated two years ago at the close of the war period. Vigorous efforts should now be made to complete the bulk of this work in the next five years, or the eventual cost will be greatly increased and development of the Territory will be delayed.

The approaching completion of the Government railroad and the more liberal coal and oil leasing and water power laws have all stimulated activity in Alaska and have been an earnest of a more liberal attitude toward the Territory on the part of the Federal Govern-ment. In order to handle the entire road and trail project with the greatest eventual economy the following amounts should be appropriated each year:

Fiscal year.	Working season.	Amount.
First (1923). Second (1924). Third (1925). Fourth (1926). Ffurth (1927).	1924 1925	\$1,200,000 1,500,000 1,600,000 1,400,000 1,100,000
Total for first 5 years		6,800,000
Sixth (1928). Seventh (1929). Eighth (1930). Ninth (1931). Tenth (1932).	1928 1929 1930	$\begin{array}{c} 900,000\\ 750,000\\ 600,000\\ 500,000\\ 450,000\end{array}$
Total for second 5 years Total for 10 years		3,200,000 10,000,000

The annual maintenance of the completed system thereafter, as nearly as can be estimated at this time, will cost about \$450,000. By that time, however, Alaska should have developed to such an extent REPORT OF CHIEF OF ENGINEERS, U. S. ARMY, 1921.

as to take over the major portion of this burden as a part of her own interior development.

A very important point in connection with these appropriations is the fact that the working season is a very short one and the end of the fiscal year cocurs just as the work is well launched. Preparations for this work must be started months before and in most cases supplies must be shipped in and hauled over the snow during the previous winter. Money appropriated on June 30, 1921, for the fiscal year 1922, will actually be nearly all spent during the summer of 1921. It must all be spent before July 1, 1922, hence the appropriation for 1923 should be available before that fiscal year actually begins. Work can not be economically started after July 1 nor stopped and then started up again. For this reason, each annual appropriation should be immediately available and remain available until expended. In addition, authority should be given to incur in advance of actual operation, obligations of about half a million dollars, to be met by the appropriation of the following fiscal year to provide for alternate years when the long session frequently does not pass the Army appropriation until June, or even August.

Estimate for fiscal year ending June 30, 1923.

Object of expenditure.	Estimated, 1923.	Appropri- ated, 1922.
For the construction, repair and maintenance of military and post roads, tram- ways, ferries, bridges, and trails, Territory of Alaska, to be expended under the direction of the Board of Road Commissioners, described in Section 2, of an act entitled, "To provide for the construction and maintenance of roads, the		
establishment and maintenance of schools and the care and support of insane persons in the District of Alaska, and for other purposes," approved January 27, 1905, as amended by the act approved May 14, 1906, and to be expended conformably to the provisions of said act as amended, to be immediately available and to remain available until expended	\$1,200,000	\$425,000

It is proposed to distribute the funds requested for the fiscal year 1923 approximately as follows:

Estimate of funds, 1923.

ECONOMIC PROGRESS.

Total.....

The resources of the Territory, in spite of the imposing aggregate ralue of products to date, are yet only in the beginning of their development. Important resources still exist untouched among the basic products of the Territory, that is, minerals and forest products. The continued development and production of Alaska's wonderful fisheries is certain. With increase in population will come substan-tial development in agriculture. The rarely beautiful furs of Alaska will always be notable in the markets of the world.

Minerals are being produced in the following order of value: Copper, gold, silver, coal, lead, tin, platinum, paladium, marble, gypsum, and petroleum. The high prices, now happily over their peak, were an obstacle in the continued working and the further development of the great placer deposits in Alaska. Lode mining of gold has continued in southeastern Alaska, but under the same handicap. With decreased prices and the return of miners to Alaska, lode mines are to be expected in the interior. One lode mine in the Kuskokwim at Nixon Forks has made substantial progress during the past year. The deposits of the Kantishna are again exciting interest and with the completion of the Government railroad, development can be looked for. The mining of copper has continued,

71115в-21-2

Beaver and marten are still protected and have increased very considerably.

COMMERCIAL STATISTICS.

The commerce of the Territory, while suffering a decline amounting to more than \$1,000,000 in value, shows a much better condition of trade than that during the last year, when the slump was over seventeen million from that of 1918. The balance of trade in the Territory's favor is about \$1,500,000 more than in 1919. A more stable condition is noted in that the imports and exports have been about the same for the last two years.

	Total	272	440	7121

¹ In the table, page 2103 of annual report for 1920, expenditures are shown for 1,352 miles of flagged trails. This includes winter flagging of 740 miles of permanent routes included in main Table I above. The actual mileage in addition to the 4,890 of Table I, therefore, is 712, including 100 miles of Nome Locals.

NOTE-Each year many miles of trail are staked after snow has fallen. This is necessary for the guidance and safety of winter travel. Some of these staked trails follow permanent routes; others are winter cut-offs or vary from year to year as conditions require. The foregoing additional mileage includes routes or parts of routes so staked where not enough work has been done to warrant classification as trail in main Table I above.

REMARKS ON SUB-PROJECTS

Route 1. Turned over to the Department of Agriculture in co-operation with the Territory of Alaska, July 1, 1920. The funds of the Department of Agriculture are limited to projects in the Tongass and Chugach National Forests. This releases Alaska Road Commission funds for use in other parts of the Territory.

Route 2. (10 miles), Juneau to Duck River. Maintained and improved. Rehabilitation of balance begun.

ANNUAL MAINTENANCE WORK.

In table V is given a summary of conditions as to annual maintenance work. It will be noted that most of the wagon road mileage has been fairly consistently maintained, but that approximately half the sled road and trail mileage, exclusive of flagging, has been practically abandoned, due to lack of funds or other causes.

	TAI	BLE V.						
No expenditure	· · ·		Mileage.	·				
since fiscal year	Wagon road.	Sled road.	Trail.	Flagged trail.	Total.			
1905 1907 1910		10	262 110 22		262 110 110 22			
1911 1912 1918 1014	11/2	105	108 188 90		108 293 91½

Total war period	1031/2	95	825	[[1,02335			
Grand total	113	256	1,610		1,979			
1920 report	1,031	636	3,223	1,452	6,342			
1920 work on permanent route Flagged trail (Table I) Flagged trail (Table II)		380	1,613 740	712	2,911 740 712			
Total 1920 work	918	380	2,353	712	4,363			

NOTE-This table only takes account of complete routes upon which no work at all was done. In addition, several hundred miles of parts of routes, notably the Vadlez-Willow Creeck (92 miles) section of the main Valdez-Fairbanks Military Road and the Haines-Pleasant Camp (471/9 miles) Road, were completely abandoned or the expenditures were inadequate to render them passable. A few miles were maintained by the Territory during 1920.

The annual cost of maintenance of routes in Alaska varies considerably with the locality, the range of climate being greater than that of the United States, and the cost of labor varying greatly. The experience of this Board indicates that for all Alaska proper, average maintenance costs, including a fair allowance for floods, etc., are about as indicated in Table VI following:

TABLE	VI.
-------	-----

Classification.	Mileage.	Annual Maintenance per mile.	Total
Wagon roads	1,031 636 3,223 712	\$250.00 25.00 10.00 8.00	\$257,750.00 15,900.00 82,280.00 2,136.00
Totals	5,602	55.50	808,016.00

The above does not provide for any improvement or extensions. The intermediate, or interior, sections of many of the through routes need improvement to the same standard as the rest so that the entire route may be used throughout by the same traffic without the necessity of breaking loads. A certain amount of new work on extensions must be provided for each year to keep pace with developments. This has only been possible up to the present time at the expense of needed maintenance work.

CONDITION AT END OF FISCAL YEAR.

Table VII summarizes the status of the work of investigation and rehabilitation begun this year. The funds available enabled substantial progress to be made and the investigation should be practically completed during the current season.

TABLE VII.

with the best facilities available for a single individual to make a complete inspection of the entire mileage for which the Board is responsible.

Actually the President and Engineer Officer spent about 80% of their time in the field. They have visited every district at lease once and have inspected most of the major projects a number of times. The Secretary and Disbursing Officer have been engaged in overhauling the property, accounts and office methods and have started a tour of inspection of the district offices to standardize methods and accounts.

The President left Washington, D. C., on June 18, 1920, and made the following trips involving means of transportation as indicated:

Conveyance.	Mileage.
Railroad passenger train	
Railroad gas speeder	
Railroad freight train	111

and corduroy repaired. Total cost

168 Road......(18 miles) bad was dragged, ditches cleaned, crew was established on this route. antial improvements to this portion is section has always been a very necessary to place a heavy gravel ke it passable in all seasons. Total

Carty Road...... $(73\frac{1}{2} miles)$

ough on this portion of the road early were made, slides removed, ditches he Relta River at Mile 222 was reided, one mile of gravel surfacing was rally excellent condition, the greatest avel surfaced. The heaviest expenses ;aused by the spring break-up. Total

lson Road...... $(20\frac{1}{2} miles)$ 1 this road during the entire season. lverts rebuilt, ditches opened, slides graded. General repairs were made. 5.

ANNUAL REPORT OF THE ALASKA ROAD COMMISSION. 31

two miles of the road. This route is now in excellent condition. Total expenditure \$21,308.62.

This trail leads across Skolai Pass to the Chisana Mining District. Trail was staked during the winter. Total expenditure \$400,000.

Route 57—McCarthy-Nizina...(4 miles of road and 7 miles of sled road)

Work upon this project was started during the summer of 1920. One crew of men was worked during the entire season. This road extends from McCarthy, on the Copper River railroad, to the Nizina River. Three miles of road were constructed and five miles of clearing and grubbing performed. Timber from the bridge across the Nizina River was salvaged and will be used in constructing the new bridge. The Territory is co-operating to the extent of \$25,000 in the construction of the bridge across the Nizina River. This road will lead to the bridge site and it is planned to complete the remainder of the road to the Nizina River during this season and start construction on the bridge across the river in the winter of 1921. This river crossing has been an appalling obstacle for many years to operators in the upper Chitina Valley. Total expenditure \$17,670.38.

Route 61—Strelna-Kuskulana.

The work of this Board upon this system of roads consisted in keeping open the bridge across the Kuskulana River. This bridge was subjected to attack during the summer and protective operations were gotten under way so that the bridge was saved and maintained in good condition. Territorial Board paid vouchers amounting to \$750, this Board paying the balance. Total expenditure \$1,197.31.

Route 65—Chistochena-Eagle Trail.....(222 miles)

Part of the old Valdez-Fort Egbert Trail. No expenditure during the fiscal year. To be examined this season.

Route 65A—Gulkana-Chistochena—(4 miles of road, 36 miles of trail.)

Work was started on this route, which is the inlet to the Slate Creek mining disctrict, as well as the Nabesna district. Four miles of road were graded, one mile of side hill grading performed. The next work necessary on this route is the bridge across the Gakona River. Piling for this bridge was gotten out and delivered to the bridge site during the winter. Total expenditures \$2,581.32.

Reconnaissance was made during the summer of 1920 in connection with Route 65A.

EXAMINATIONS AND SURVEYS

In response to petitions, reconnaissances are in progress or are contemplated as follows: Eagle-Gulkana, Kechumstuk-Mc-Carty, Paxsons-Valdez Creek, Chistochena-Nabesna-Chisana, Katalla-Yakataga, Katalla-Mile 39 (C. R. & N. W. R. R.) Chitina-Kotsina and McCarthy locals.

ANNUAL REPORT OF THE ALASKA ROAD COMMISSION. 33

No expenditure was charged to this new route. A reconnassance was made and necessary work will be done this season in anticipation of next winter's traffic.

Route 24—Mile 29 ANRR-Sunrise Road......(39 miles)

Includes old Moose Pass trail and Sixmile Creek-Sunrise section of Route 12, now partly abandoned. General work in removing windfalls, cleaning ditches and repairing corduroy was carried out. Total expenditure \$1,862.75.

Includes this section of old Route 12. The fifteen miles of road from Lynx Creek to Mile 34 on the Government Railroad have been abandoned in favor of Route 24. Routine maintenance work was performed and cost was included under Route 24.

This route is a part of old Route 12. No expenditure during the fiscal year. To be rehabilitated this season.

This road is the important outlet of the Willow Creek Mining District. The entire road has now been graveled and the road widened and extended two additional miles. Mining operations are again beginning to be active in this region and the presence of this road has been an important relief to this small but substantial mining district. Total expenditure \$21, 893.44.

This road branches off at Mile 34 of Route 35. It is planned to extend this road through the next working season along Archangel Creek. Total expenditure \$495.17.

This road branches off at Mile $26\frac{1}{2}$ of Route 35. It is planned to continue its improvement. Total expenditure, \$479.50.

Route 35C—Palmer-Matanuska Road......(1½ miles)

It is planned to complete the improvement of this important route. No expenditure during the fiscal year.

This road branches off at Mile 35 of Route 35 and will cross over the divide into the basin of Willow Creek. Its construction is under way. No expenditure reported to end of fiscal year.

Route 48—Iliamna Bay-Iliamna Lake (10 miles of road and two miles of trail)

To be rehabilitated and completed this season. No expenditures during the fiscal year.

Route 51—Talkeetna-Cache Creek.. (6 miles road, 34 miles sled road).

Work on this road was performed through co-operative agreement with the Territory. This road is a very important one and starting in May, first a careful location survey was made throughout. The road has been cleared the entire distance to Cache Creek. Five miles have been grubbed and partially graded. Bridges have been built throughout and with additional plant it is expected to prosecute this work to completion. This road it is hoped to be able to extend into the rich mineralized district of the upper Yentna Valley and later thorugh Rainy Pass into the Kuskokwim. Expenditure: Federal funds, \$45,0126.77; Territorial funds,\$34,620.20.

This route is under investigation and some improvement will be undertaken, if practicable, to afford relief to the important, though isolated, district based upon the town of Kenai. Total expenditure, \$96.00.

Route 75—Anchorage-Eagle River.. (5 miles of road and 5 miles of trail.)

This road, which is an important outlet to Anchorage and permits farmers in the vicinity to bring their products into town, was initiated this season. Five miles have been located and cleared. About one mile of grading has been done, the balance it is expected to grade this season. Total expenditure \$8,505.91.

EXAMINATIONS AND SURVEYS.

In response to petitions, reconnaissances are in progress or are contemplated as follows: Herendeen Bay Portage, Cold Bay-Becharof Lake, Geographic Harbor-Land of Ten Thousand Smokes, Kodiak locals, Iliamna Lake-Lake Clark, Kenai-Homer, Hope-Devil Creek-Moose Pass, Seldovia-McDonald Spit, Chulitna Ferry, Fish-hook Inn-Little Susitna River, Talkeetna-Iron Creek, Peter's Creek-Skwentna River-Rainy Pass, Kichatna River-Simpson Pass, and Quinhagak-Nushagak-Cold Bay. * Responsibility for maintenance of Fairbanks local roads for the fiscal year was assumed by the Territory of Alaska.

Substantial improvement was made on this route during the season. The road was regraded and graveled from Fairbanks to Mile 10. Temporary repairs were made to the Pile Driver bridge which will be built during next season. The road was thoroughly dragged throughout, gravel pits stripped

for grading the road this season. A steam shovel is being shipped to Fairbanks for this graveling and with the close of work during the present season this road should be in excellent condition. Total expenditure \$40,985.32.

This route is in the main mail route to the westward, formerly extending from Ester siding to Fort Gibbon. Since the completion of the Government Railroad all traffic starts from Dunbar Station, a point on the Government railroad 18 miles north of Nenana. Grading was performed near the Tolovana River and along the Tanana near Baker. Open stretches across the Yukon were staked with tripods. Total expenditure, \$3,356.10.

Route 7J—Fairbanks-Chena Hot Springs Sled Road... (64 miles)

This route connects Fairbanks with the famous Chena River Hot Springs. The entire road is used by prospectors and miners in the upper Chena River mining district. The bridge over the Little Chena River was made; a thorough reconnaissance of the entire road was made during the winter. Total expenditure. \$507.75.

Route 9— Rampart-Eureka Road (6½ miles wagon road, 21½ miles of sled road)

The seasonal repairs upon this road was carried on by the Territory. The improvement of this road from the Yukon to the Tanana is contemplated. With this in view, a thorough reconnaisance was made with dog team during the winter.

Route 11A—Eagle-O'Brien Creek.. (17 miles of road, 13 miles of sled road)

This road was generally maintained and repaired, culverts rebuilt, slides removed, drainage reconstructed. The road is in excellent condition now from Eagle to Mile 10. Very substantial work is necessary to extend this road to the mineral workings on Forty Mile. Total expenditure, \$4012.09.

To be rehabilitated this season. No expenditures during the fiscal year.

Route 11D-Canyon Creek-Walker's Fork Sled Road. (10 miles) To be rehabilitated this season. No expenditures during the fiscal year.

Clearing was performed, bridges rebuilt, and route put in excellent condition as a summer pack trail. Total expenditure \$2,273.50

The entire road was dragged, ditches opened, corduroy repaired, culverts rebuilt and ,in spite of the heavy forest fires occuring last summer, the road was maintained in excellent condition. Total expenditure \$6,543.37.

Repairs were made to bridges on this road during the month of December. Several small bridges were rebuilt. Total expenditure. \$1,548.71.

This route is the main mail route to points west of Fort Gibbon. The work consisted in staking the trail, chiefly on the surface of the Yukon River. Considerable staking in necesary to avoid open places and overflows and minimize the distance. Total expenditure, \$500.00.

Reconnaisance to be made to determine desirability of rehabilitation. No expenditure during the fiscal year.

Route 22—Hot Springs-Sullivan Creek Road.......(9 miles) This road was maintained during 1920 by the Territory. Federal co-operation was made during the summer of 1920 in order to further this work. Total expenditure, \$114.50.

This important sled road was gone over thoroughly during the summer of 1920. It is now in excellent condition as a winter sled road or a summer pack trail. Very heavy work would be necessary to reconstruct it as a summer road. The minerau developments in the Chandalar mining district are to be thoroughly investigated this summer to ascertain whether the construction of this as a summer road is worth while. Total expenditure \$1.998.51.

This route is the winter mail route for the Koyukuk and an important route of winter travel for the Kobuk Valey. The route was gone over and tripods re-established. Thorough reconnaissance will be made this summer to reestablish it throughout. This route is an important one and has fallen into bad condition during the war years. Total expenditure \$1,010.25.

Route 30-Hot Springs Landing-Eureka Road......(24 miles)

This road was maintained by the Territory during the summer of 1920. Plans have been made for the rehabilitation of this road with the cooperation of the Territory during the present season. Total expenditure \$40,00.

Reconnaissance to be made to determine advisability of rehabilitation. No expenditure during the scal year.

ture during fiscal year \$353.50.

This trail is the main winter mail route to the Iditarod mining district. Its rehabilitation is under way. No expenditure during the fiscal year.

Improvement authorized and reconnaissance under way. No expenditure reported up to end of fiscal year:

Route 34—Iditarod-Dishkaket..38 miles of sled road and ⁶⁸ miles of trail)

Reconnaissance to be made to determine advisability of r^{e-}habilitation. No expenditure during fiscal year.

This excellent road was maintained in good condition during the present season. It serves as an outlet to the Poorman and Long mining districts. General repairs were made, ditches cleaned. Total expenditure \$5,195.26.

To be improved during this season. No expenditure renorted to end of fiscal year.

Route 38D—Tacotna-Ophir (7½ miles wagon road, 17½ miles trail)

In co-operation with the Territory, this road, started in 1917, was gone over and again put under construction this season. A foreman was sent in to the district from Fairbanks and equipment shipped from Seattle. Work was well prosecuted in spite of a shortage of men in the district during 1921. A reconnaisance was made in this district by the engineer officer of the board during the winter, and as a result work is planned as necessary to complete this road during this season. Equipment is being shipped in from Seattle on the first boat. This road serves an artery for a very productive mining district and is also a portage from the Kuskokwim to the Yukon River. Total expenditure, \$9,510.73.

Reconnaissance was made during the winter but report will not be received till after the opening of navigation. Total expenditure \$56.50.

An effort was made during the season to give some relief to the Kantishna Mining District. First, the dog trail from the railroad to Kantishna was maintained in excellent condition. Second, an effort was made by small detours to make the sled road from Kantishna Post Office to Roosevelt, the head of navigation on the Kantishna River, passable for summer traffic. This road is 32 miles long. The work was necessarily widely distributed. However, this work performed during the summer provides considerable relief to this promising lode district. During the winter a very thorough reconnaissance was made by the engineer officer of this Board and as a result surveys are under way for a summer and a winter route from Lignite on the Government railroad to this district. In addition to this, such relief as may be possible with the small funds of this board will be given. Total expenditure, \$15,029.55; Territorial funds, \$2,865.77; Federal funds, \$12,163.78.

Route 47—Coldfoot-Wiseman Sled Road......(11 miles)

Thorough reconnaissance is to be made this summer in connection with routes 23B and 29. No expenditure up to end of fiscal year.

Rout 59—Fairbanks Bridge.....

Flooring was repaired and some painting performed. Total expenditure \$1,602.57.

A small amount of work was done on this road during this year. To make substantial improvement in this district it is necessary to establish this route as a summer road as far as the Logjam, 27 miles. Plans are being made with this in view. Total expenditure, \$1,662.52.

Reconnaissance to be made to determine advisability of

rehabilitation. No expenditure during the fiscal year.

Route 76-Government Railroad-Valdez Creek Sled Road (55 miles)

Reconnaisance was made during the winter to determine the most feasible connection between the important Valdez Creek mining district and the Government railroad, soon to be completed. This route will supercede the old sled road from Valdez Creek to the southeast joining the Fairbanks-Chitina route at Gulkana. Total expenditure, \$575.62.

EXAMINATIONS AND SURVEYS.

In response to petitions, reconnaissances are in progress or are contemplated as follows: Circle-Fort Yukon, Caro-Coldfoot-Alatna, Koyukuk-Kobuk, Iditarod-Holy Cross-Akiak-Bethel Quinhagek, Kuskokwim Portage, Roosevelt-McGrath, and Nixon's Fork.

Routes 8, 8A and 8B—Nome-Council (57 miles road, 25 miles of trail)

This important road connects Nome and Council and is a summer mail route supplying all the intermediate camps between these towns. General location is along the shore of Bering Sea, through Fort Davis to Solomon, then along Skookum Pass to the head of the Fox River, thence down Fox River to Council. Seasonal staking between Nome and Solomon and between Solomon and East Fork are included in Routes 68. The work consisted in repairing all parts of the road. Heavy work was necessary in protecting the Fort Davis Suspension bridge from destruction by the Nome River. A substantial revetment of concrete was placed around the abutment and, while the work was costly, quick action was necessary and the bridge saved and the road kept open. Heavy construction work was done between Fort Davis and Cape Nome in completing the portion of the road around Cape Nome. Between Cape Nome and Solomon the ferries were maintained. From Solomon to East Fork extensive repair work was done upon the road, corduroy was repaired, gravel hauled upon the roads and all put in a thoroughly good condition. From East Fork to Council very little work was done and this portion of the road requires extensive repair work to make this important road an excellent one. Territorial co-operation was had upon this road. Expenditure from Federal funds, \$18,350.98; expenditure from Territorial funds, \$17,186.70.

Route 13A—Nome-Bessie Road......(3½ miles)

This is an important road leading out of Nome and is the main artery for traffic from Nome to all adjacent creeks. Very little work was done upon this road in the last two years. The road was dragged and graveled and put in a thoroughly good condition throughout. Total expenditure, \$671.97.

Route 13C—Bessie-Little Creek Road..... $(1\frac{1}{4}$ miles) No expenditure reported on this road up to the end of the fiscal year.

Route 13D—Bessie-Dry Creek Road...... $(1\frac{1}{4} \text{ miles})$ No expenditure on this road up to the end of the fiscal year.

This important road requires extensive repair and reconstruction. A small amount of regrading was done during the past season but it is still not in good condition for travel. Total expenditure, \$123.35.

Route 13G—Grass Gulch Road......(2 miles) No expenditure reported on this road up to the end of the fiscal year.

Route 13H—Center Creek Road......(1½ miles) Expenditure, \$5.00

Route 13J—Wonder-Flat Creek Road......(2 miles) No expenditure reported on this road up to the end of the fiscal year.

This road was dragged and ditches cleaned and a number of culverts rebuilt. Total expenditure, \$284.16.

The winter trail was gone over from the Unalaklik Creek to Bluff. Great damage was done to this trail in the fall of 1919. Throughout the trail stakes were straightened and missing ones replaced, bridges were built and the trail, which is a very important one, built up to its previous condition. Seasonal staking is included in Routes 68. Total expenditure, \$1,539.50.

This trail was practically destroyed by a storm in the fall of 1919. A crew of four men working during the month of September, repaired it. The trail was gone over for its entire length, culverts and bridges rebuilt, nigger heads grubbed out, and four miles of new trail cut. All trail stakes were

straightened and missing ones replaced. Seasonal staking included under Routes 68.

Routes 25A-H (inclusive)—Nome Local Roads.....(24½ miles)

All of the roads west of Nome are comprised under this heading. The Sinrok Valley Road was maintained and extensive repairs made in the Cripple River Road. Total expenditures \$381.20. The Submarine Paystreak was extended onefourth of a mile and the entire length cleaned and repaired. Total expenditure \$172.63. The bridge at the mouth of Center Creek was rebuilt and the road generally gone over. Expenditure from federal funds \$279.50. Expenditure from territorial funds \$12.50. A foot bridge over the Snake River on the Anvil-Glacier Road was replaced by a tram costing \$150.00. Repair and maintenance work was done on the Snake River extension. Total cost, \$256.00.

Route 251—Sinrock Ferry.

General maintenance and salary of Ferryman. Total expenditure: Federal, \$162.75; Territorial, \$150.00.

This road was completed to Patterson Creek, six miles from Candle. Four thousand feet of corduroy was laid and surfacing placed. Ten culverts were built. The road was ditched and graded throughout. Expenditure from federal funds \$3,275.42. Expenditure from Territorial funds,\$1,899.59.

The entire road was gone over, numerous fords throughout the entire length cut by grading side lines as detours. A number of culverts were built and general maintenance performed. Expenditure from local funds, \$2.162.77. Expenditure from Territorial funds, \$4.640.56.

Stakes were straightened out and replaced. Additional expenditure included under Routes 68. Expenditure \$168.00.

Stakes were straightened out and replaced. Expenditure included under Routes 68.

Routes 49—Davidson's Landing-Taylor..(24 miles wagon road, 16 miles sled road).

Work on this road was done by contract and was confined to the first 24 miles leading from Davidson's Landing. Culverts were rebuilt, ditches cleaned and the road thoroughly gone over. This is an important road, serving as a winter sled route and summer trail for operators reaching the Kougarak mining district from Imaruk Basin. Total expenditure, \$392.45.

Route 62—Dime Creek Corduroy.....

Corduroy was cut and delivered during the winter, to be placed this season. Total expenditure, \$6,221.27.

Under this heading all expenditures for winter work is included. The expenditure includes the purchase of material for making flags, and the cost of straightening up all stakes and replacing the missing ones on the permanently staked winter trails around Nome, throughout the Seward Peninsula and connecting with the Yukon Valley. Many of the trails are only seasonal ones and are staked by the miners themselves to the creeks on which their workings occur. In these cases this board furnishes the material for staking and the miners did the work. Total expenditure, \$6,510.53, includes work on Routes 8, 18, 21, 28, 37, 42, and 67, a total of 740 miles, in addition to the following:

EXAMINATIONS AND SURVEYS.

The act of June 30, 1921 contains the following language: "Provided further that not to exceed \$10,000 of the foregoing amount shall be expended for a preliminary investigation and report on the feasibility, desirability and cost of the best and most practical connection between the Nome-Shelton system of communications and the coal deposits of the Kugruk River, Chicago Creek and the Keewalik mining district, whether by wagon road, sled road, tramway, trail or other means."

ANNUAL REPORT OF THE ALASKA

Report thereon will be submitted In response to petitions, reconnaor are contemplated as follows: Teller Unalaklik, Haycock-Candle, Kiana-S Barrow and St. Michael-Fortuna Ledge

CONTRACTS IN F

None.

COMMERCIAL STA

A careful traffic census was begu 1911. Comparing the expenditures for at the present rate with the cost of amount of freight at the rates prevai constructed, a figure is obtained which saving to the community served by particular route in point.

Combining the saving for all the mission, the following table for 1911, compiled.

Year.	Expenditure for the year
1911 1912	917 208 /
1918. 1911-1918.	353,118. 987,199.

From this table it will be seen that years alone was almost three times t roads to the end of 1913. Records for burned up in the fire of 1915. No cenwar. A new census was inaugurated J

In the interior, the great cost of m or packing, together with the difficulty a it at all, constitutes the main obstacle opment of the district.

During the opening of new diggin a few years ago, beans, coffee, sugar, ha etc., were sold at \$1.50 per pound. The most a dollar a pound, so that the origin of relatively little importance. And e could not keep pace with the demand. charges for transporting supplies from to some mines about one hundred mile 40-Mile District were greater than the or plus the freight from the United \$ (Dawson is 1,700 miles from Seattle.)

The cost of transportation by the 1 in Alaska are shown in the following tal

IONS AND SURVEYS.

1921 contains the following language: at not to exceed \$10,000 of the foreended for a preliminary investigation lity, desirability and cost of the best ction between the Nome-Shelton system he coal deposits of the Kugruk River, Keewalik mining district, whether by imway, trail or other means."

ANNUAL REPORT OF THE ALASKA ROAD COMMISSION. 45

Report thereon will be submitted when completed.

In response to petitions, reconnaissances are in progress or are contemplated as follows: Teller-Wales, Golovin-Haycock-Unalaklik, Haycock-Candle, Kiana-Shungnak, Kotzebue-Point Barrow and St. Michael-Fortuna Ledge.

CONTRACTS IN FORCE.

None.

COMMERCIAL STATISTICS.

A careful traffic census was begun by the Commission in 1911. Comparing the expenditures for freight on each route at the present rate with the cost of transporting the same amount of freight at the rates prevailing before the road was constructed, a figure is obtained which represents the economic saving to the community served by the construction of the particular route in point.

Combining the saving for all the routes built by the Commission, the following table for 1911, 1912, and 1913, has been compiled.

Year.		Total expend- itures for roads to end of year.	Economic saving to shippers.
1911. 1912. 1913 1911-1913	817,308.72 353,118.29	\$1,903,103.27 2,220,406.99 2,573,525.28 2,578,525.28	\$1,981,677.00 2,141,688.00 2,144,667.00 6,268,032.00

From this table it will be seen that the saving in these three years alone was almost three times the total expenditure for roads to the end of 1913. Records for succeeding years were burned up in the fire of 1915. No census was taken during the war. A new census was inaugurated Jan. 1, 1921.

In the interior, the great cost of moving freight by teaming or packing, together with the difficulty and uncertainty of moving it at all, constitutes the main obstacle to the growth and development of the district.

During the opening of new diggings in the Chisana region a few years ago, beans, coffee, sugar, hay, candles, bacon, grain, etc., were sold at \$1.50 per pound. The freight charges were almost a dollar a pound, so that the original cost of the article was of relatively little importance. And even at that, the supply could not keep pace with the demand. Last summer the freight charges for transporting supplies from Dawson, in the Klondike, to some mines about one hundred miles away in the American 40-Mile District were greater than the original cost of the supplies plus the freight from the United States to the Klondike. (Dawson is 1,700 miles from Seattle.)

The cost of transportation by the usual modes of transport in Alaska are shown in the following table:

Route 62—Dime Creek Corduroy.....

Corduroy was cut and delivered during the winter, to be placed this season. Total expenditure, \$6,221.27.

Stakes were straightened out and replaced. Expenditure included under Routes 68.

Routes 68—Flagged Trails.....(672 miles)

Under this heading all expenditures for winter work is included. The expenditure includes the purchase of material for making flags, and the cost of straightening up all stakes and replacing the missing ones on the permanently staked winter trails around Nome, throughout the Seward Peninsula and connecting with the Yukon Valley. Many of the trails are only seasonal ones and are staked by the miners themselves to the creeks on which their workings occur. In these cases this board furnishes the material for staking and the miners did the work. Total expenditure, \$6,510.53, includes work on Routes 8, 18, 21, 28, 37, 42, and 67, a total of 740 miles, in addition to the following:

Name.	Dis- tance. Miles.	Perma- nent. Miles.	Sea- sonal. Miles.

Entire road was rehabilitated and improvement begun. Total expenditure, \$715.25.

Route 77-Shelton Ferry.

Routine repairs. Total expenditure, \$150.00.

EXAMINATIONS AND SURVEYS.

The act of June 30, 1921 contains the following language: "Provided further that not to exceed \$10,000 of the foregoing amount shall be expended for a preliminary investigation and report on the feasibility, desirability and cost of the best and most practical connection between the Nome-Shelton system of communications and the coal deposits of the Kugruk River. Chicago Creek and the Keewalik mining district, whether by wagon road, sled road, tramway, trail or other means."

ANNUAL REPORT OF THE ALASKA ROA

Report thereon will be submitted wh In response to petitions, reconnaissa or are contemplated as follows: Teller-Wa Unalaklik, Haycock-Candle, Kiana-Shun Barrow and St. Michael-Fortuna Ledge.

COMMERCIAL STATIS

A careful traffic census was begun 1911. Comparing the expenditures for at the present rate with the cost of t amount of freight at the rates prevailing constructed, a figure is obtained which resaving to the community served by th particular route in point.

Combining the saving for all the rominission, the following table for 1911, 19 compiled.

Year.	Expenditures for the year.
1911	\$266,777.95 817,308.72
1912 1913	353,118.29 937,199.96
1911-1918	937,199.90

From this table it will be seen that t years alone was almost three times the roads to the end of 1913. Records for burned up in the fire of 1915. No censu war. A new census was inaugurated Ja In the interior, the great cost of mo

In the interior, the great cost of mo or packing, together with the difficulty ar it at all, constitutes the main obstacle t opment of the district.

During the opening of new digging a few years ago, beans, coffee, sugar, ha etc., were sold at \$1.50 per pound. The most a dollar a pound, so that the origin of relatively little importance. And e could not keep pace with the demand. charges for transporting supplies from to some mines about one hundred mile 40-Mile District were greater than the or plus the freight from the United 5 (Dawson is 1,700 miles from Seattle.)

The cost of transportation by the in Alaska are shown in the following ta

Winter:	Per Ton-mile.
Bob-sled (sled road)	\$0.37
Double-ender (trail)	1.30
Dog-team (trail)	6.30
Summer :	
Truck (wagon road)	0.40
Wagon (wagon road)	$\dots \dots 1.23$
Pack train (trail)	
Man (no trail)	

* Average from very widely varying figures. At Lisianski Inlet, in Souhteastern Alaska, last summer I observed lumber, pipe, tar paper, groceries, etc., being carried on the backs of Indians from the beach up a slippery mountain trail about 7,500 feet long to a new gold strike in a little basin at about 800 feet elevation at 4 cents per pound, or \$80.00 per ton—over 1 cent per ton-foot.

Railroad transportation cannot yet be regarded as a usual form for Alaska, and steamship rates are entirely arbitrary, depending upon competition. They, like the existing railroad rates, have been fixed by two factors only; 1st, the cost of hauling on some competing wagon road, sled road, or trail, where such competition exists (or, in the case of steamships, sometimes by competing steamer line); and 2nd, by the highest rate the freight can stand and be shipped at all.

The table shows the actual costs at the rates for teams, labor, food, forage, etc., prevailing in the great interior regions of Alaska. They are based also on the costs of hauling large quantities. On the south coast the comparative values are the same, but the actual values are about one-third less because of lower costs of above controling elements.

ADDITIONAL OPERATIONS OF THE BOARD OR OF ITS MEMBERS.

The following additional duties have been imposed upon the members of the board by appropriate authority.

- (a) Effective April 1st, 1921, the Juneau, Alaska, engineer district was created by G. O. No. 1, War Department, Office of the Chief of Engineers, Washington, February 21, 1921. The President of the Board, in addition to his other duties, was appointed District Engineer; the other two members of the board were placed under the immediate orders of the District Engineer and the secretary and disbursing officer of the board was, in addition, designated as disbursing officer for the district. The Alaska district does not form a part of the Northern Pacific Division; the District Engineer reports direct to the Chief of Engineers. Detailed report of the operations of the Alaska District will be found on pages 948-54 inclusive, Report of Chief of Engineers. Expenditures since April 1st, 1921, and to include vouchers received and placed in the account, including June 30, 1921, were \$1602.50.
- (b) By par. 3, S. O. No. 55-0, War Department, Washington, D. C., March 9, 1921, and under the provisions of

ANNUAL REPORT OF THE ALASKA ROAD C
