Head of Road Commission Tells of Work Planned---Says the Future Looks Bright for the Interior.

Major J. C. Gotwals, president of the Alaska Road Commission, arrived in McGrath on Monday, headed by Leonard Seppala and his string of fifteen Siberian dogs. Major Gotwals, who came direct from the Outside to Anchorage, which latter place he left on January 8 to make the present trip, has been in such close touch with Outside affairs and conditions, that the following interview, in which is detailed the work planned by the Road Commission affecting this section, will be read with most pleasurable interest.

"Prices have taken a tumble on the Outside to such an extent that relief may be expected in the interior of Alaska during the coming summer," said Maj. Gotwals. "Taken at random, the following prices, current in Seattle during my visit there in December, illustrate this downward trend: Botatoes, \$30 per ton; Douglas fr, \$20 a thousand; wheat, \$1.50 per bushel. Other commodities are at low prices corresponding to these staples.

"With the completion of the Government railroad this next summer and the delivery of freight through this new artery, a drop in prices in much of the interior is to be looked for, for the reason, tirst, prices have dropped outside; second, the more rapid deliveries cut down the charges for

LABOR IN THE INTERIOR.

Speaking of the shortage of men throughout Alaska, Maj. Gotwals said:

"The acute shortage of men in the interior now can be greatly reduced during the confing summer. The number of men enemployed Outside now includes many former Alaskans anxious to return. Many lack the necessary transportation. It is planned on Alaskan Road Commission projects wherever labor shortage exists to bring in men from Outside. This will be well worth while for all interior employers of labor, as the men thus brought in, if carefully selected, would remain and further add to the productiveness of the interior in the coming prosperous years.

"The value of the development of the Nixon Forks Quartz to the Upper Kuskokwim as a resource to the small operator and miner is considerable. This operation will stabilize labor. The year-round workings will provide means for seasonal operators getting in a full working year. Prospectors can secure work, enabling them to secure a grubstake and thus return to their labor of finding new districts. Altogether, the Steadying effect of an all-season working in the midst of the seasonal placers will make immensely toward the depelopment of the Upper Kusko-Rwim. The old Treadwell had a great value of the same nature in the development of the Yukon' placers."

of Tacotna and McGrath by summer road. "For the future a summer road from McGrath to the railroad is planned. Whether this will come to the railroad at Talkeetna via Rainy Pass or in the neighborhood of Healy via the Kantishna district depends on investigations to be made during this winter and summer. A road is now under construction from Talkeetna to Cache Creek, Sand it is hoped to start construction on a road to the Kantishna district this next season. For this reason, whichever route is finally selected, work will be in progress next season upon the railroad end of the road from there to McGrath.

"The construction of a summer road to McGrath from the railroad will be of very little interest as la means of transporting freight. Freight for this district will inevitably come in by way of Bethel, and the hope for cheaper rates rests on increased shipping, due to greater activity in the district. But such a road will stimulate activity in this district, as men can pass over it at all seasons of the year. The interior operator will be enabled to reach and leave his workings at those two most critical periods of the year for him the break-up' and 'freeze-up.' 'There will also be service for such a road from the facility it affords of transporting small quantities of machine parts aad other indispensables in emergencies »

Itinerary.

Following is the itinerally of Major Gotwals up to date from time of leaving Anchorage, as well as that pertaining to some time in the future:

With Anton Eide, superintendent A. R. C., left Anchörage Jan. 8. Left south end of steel, mile 275, Jan. 10th; Healy, at north end of steel, Jan. 13th After spending two days in Nenana left down the river Jan. 19th. Met Leonard Seppala Jan. 22nd with his team of Siberian sweepstake winners at Hot Springs. He accompanied the party thereafter. Arrived at Tanaua-Jan. 23d and left 25th; Ruby, Jan. 28th. Left Ruby Jan. 31st. Ophir, Feb. 3rd; left Ophir Feb. 5th; Tucotna, Feb. 6th; McGrath, Feb. 7th.

Itinerary.

Following is the itineraly of Major Gotwals up to date from time of leaving Anchorage, as well as that pertaining to some time in the future:

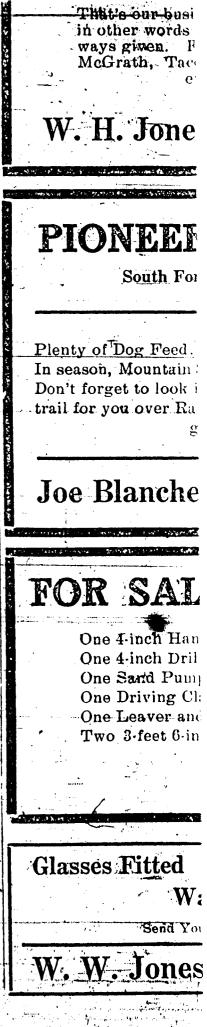

With Anton Eide, superintendent A. R. C., left Anchorage Jan. 8. Left south end of steel, mile 275, Jan. 10th; Healy, at north end of steel, Jan. 13th After spending two days in Nenana left down the river Jan. 19th. Met Leonard Seppala Jan. 22nd with his team of Siberian sweepstake winners at Hot Springs. He accompanied the party thereafter. Arrived at Tanaua-Jan. 23d and left 25th; Ruby, Jan. 28th. Left Ruby Jan. 31st. Ophir, Feb. 3rd; left Ophir Feb. 5th; Tacotna, Feb. 6th; McGrath, Feb. 7th.

After a short visit to the quartz development on Nixon Forks, Maj. Gotwals will leave for Anchorage over the Rainy Pass. On arrival at Anchorage, Mr. Eide will remain there, and Major Gotwals will, with Seppala's dogs, go over Broad Pass and go into the Kantishna mining district to study the feasible routes into that district. From there he will go direct to Nenana and return to Junsau, via Broad Pass and Seward.—Seppala will return to Nome from Nenana.

Latest In Home Brew.

The following contribution comes from a lady correspondent living down river:

Into a gallon of wood alcohol put a pint of seeded prunes, three yelloweyed beans, 19 raisins, 34 ounce dried apricots, 2 yeast cakes. a peck of dried hops, 1 quart of carbolic acid, 1: pint of trichlorolactic liquor. and 27 drops of trinitolortuol. Let this simmer on the back of the stove for a few hours, then pour it off into a steel retainer and set out on the lawn to cool. It should then he strnined through a screen made of chicken wire and put back into the steel retainers. It is then seady for business. Try it first on your motheria law or one of your creditors. If they survive for more than five minutes give them some more-they can't last long

New York .- France and Germany are rushing headlong toward another war, in the opinion of Judge Louis G. Gibbs, of the Broax court, who has just returned from a tour of western and central Europe.

GO. J. G. Steese, Head of Alaska **Boad** Commission, and Hon. Karl Theile Pay McGrath a Brief Visit

and Lith, respectively. Both gentlemen left!Juneau on August 25th by the Admiral-Watson, making the trip from Valdez to Fairbanks in two days by automobile over the military road, August 29th and 30th; reached Tanana by the Jacobs on September 1st, getting to Ruby after a breakdown and a day on siwash salmon at a fish camp, on September 3d; reached Long the same night, and Poorman on the 5th. They lets Poorman on the 6th, their guide; according to Col. Steese, being none too competent, and reached Opbir on the 13th. Col.-Steese journeyed to Tacotna during the night, coming down from the latter, place on Capt. Heino's laudch. Surveyor General Thiele, turough an unavoidable delay, did not arrive until late Thursday afternoon, coming down with Capt. Hart, on the Maple Leaf.

Col Steese, in addition to bis duties as president of the Alaska Boad Comand harbors under the Secretary of Walland consulting engineer, for the Sixteenth, lighthouse district ander the Secretary of Commerce. In additlog he is charged with Territorial work under, the Territorial Road Bosta, and with several other public Works covered (by special scis of the last Logislature,

oring W/Martin (1) and (1) at rear (1) and (201) Steere (1) work (1) at rear (

Col. James O. Steese, president of This year work was continued under a the Alaska Road Commission, and Karl similar allowment from the Territory Thelle, Surveyor General of the Terri- and \$32,000 from the Alaska Road tory, striged in McGrath on the 14th Commission. +In-addition, a separate district for the Kuskekwim was created under the superintendency of W. W. Lukens, with headquarters at Tacotna. Total allotments for the district for the year amount to about \$60,000. Work was done on the Ruby-Long road, and a bridge was purchased and shipped in for the Salatna river crossing on the proposed extension to Poorman. Relief cabins and barns have been built on the Iditarod trail; work is also authorized for the Ophir-Cripple trail, and for the McGrath-Rainy Pass trail. Some work will also be done on the winter trails out of Bethel.

> "Assuming that money is available," continued Col. Steese, "It is planned to complete the Ophir-Tacotna road next season, to begin work on the Long-Poorman road, to stake & summer trail and possibly put in a couple of relief cabins between Ophir and Poorman, and to make a substantial allotment towards rehabilitating all winter trails as far south as Quinhagak. The Kuskokwim will be retained as an independent district, under a competent superiotendent."

> Col. Steese and Surveyor General Thiele departed Thursday night with Captaln Bob, Hars on the launch Maple Lest for Betheli Trom which place they will come back up river with Oscar Samuelson and go ever the portage to Russian Mission, on the Kukop From there shey will construe down river 40 SW Michael and Nome, and back to Juneau via Seattle on the Heast grip of THE HAL

RAINY PASS EFFECTIVE

Statement of Col. Steese Pursued by Big Cannery Regarding Restoration of Mail Route.

Col. James G. Steese, president of the Alaska Road Commission, during his short stay here, discussing mail matters and the Rainy Pass trail, said: 'About the 20th of August Gevernor Bone sent for me and asked concerning the mail trail. He had correspondence with Postmaster General Hays which practically left is up to Governor Bone as to whether the mail service should be restored. Alter-our conference Governor Boge recommended the service, and bids bave since been called The bids are defective in that +for. they make Talkeetna the starting point from the Government-reliroad. This should be Nancy for this winter. V "The Alaska Road Commission baa allotted funds for the complete rebabilitation of the trail from Nancy to McGrath this fall, including tripodiog, several decours around bad spots, and the installation of a telephone line between roadbouses about ten to:slifteen miles down from the summit on each side. All this is in accordance with the report of Major.Gotwals of his dog team trip over the routes year ago.

"While in Washington last wintersI got's wire from Major Gotwals 'recommending a selephone line. 11 Immedifately secured twenty-five miles of-insulated wire and the necessary instruments and batteries. This material was all shipped to Seward last spmmer sand is ready for installation as soon as snow fells. The Alaska Road Commisalon will pay for the material and installation, but will expect the roadbouse keepers to keep the line in repair, and the traveling public generally to use care not to disturb the line, bat to repair breaks when so advised by whe roudhouse keepers.

THE

Didn't Allow Many Fish to Escape.

"The following communication, published in the Nensos News, pertaining to the salmon in lustry at the mouth of the Yukon river, will prove of interest, as it, is a matter in which the people of the Kuskokwim valley are also vitally interested:

"After, three seasons at the mouth of the Yukon, the cannery of the Carlisle Packing Company is ordered out by September 1st. This is a regulation passed by the Secretary of Commerce, after the hearing of the fish experts, Dr. E. A. Gilbert and Mr. Henry O'Malley, who made investigations last summer, (Order of Jan. 4, 1921, Department of Commerce, Bureau of Fisheries.)

"Surely it stands to reason that when each a light was as visited the Tanana this summer is to have a toll taken from its Tanks by the commercial cannery at the mouth of the Yukon, some of the peeded ash are not going to reach the spawning grounds. It is simple logic that it will be only the matter of a few years before the salmon-will be depleted. This is not a matter of guesawork on the part of those who have the welfare of the whites and native Alaskans at heart, It is a matter of observation and bitter experience from what happened on the Copper river. "There was a time to the momory of prospectors of this country. when the upper waters of the Copper river feemed in salmon. But after the establishment of cameries on the Copper river it was a matter of only a few years selore the salmon, run, began to fall off, and in recent years, it is stated. the sumber of salmon that reach the upper stages of the Copper river is negligible. One man, who had a paying for farm at Gulkana, was forced to quit for lack of fish food to dead the foxes. 'The Government finally recogdizid the seriouspens of the situation, and by this same order of Jacuary 4, 1921 prohibits all fishing on the Copper river and its tributarles, until further notice. It was a matter of stop-- anarvana from varabing and atr

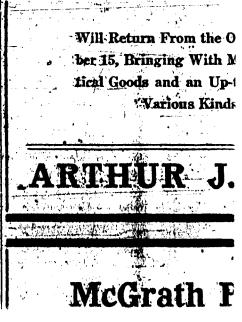

THE KUSKO TIMES SATURDAY. SEPTEMBER 14 1921

salmon that might succeed in getting up to spawning grounds. "While it is true there was a good run of saknon for a few days of this summer, Ishermen all along the Tanand say it is a very disheartening catch. Practically all the dishermen speak of the many salmon that show the net-marks. The effective methods pursued by the Carlisle Packing Company allow few of the very large fish to get by. The Government experts who noted conditions last summer were convinced of this.

"Yet we are now confronted by a petition from the cannery of the Carlisle Packing Company, asking that we, whose welfare is being menaced; sign our names asking that they be allowed to continue their depredations. Of course, there will be some who will sign. The cannery has brought a few dollars into the pockets of some, and 2 again there are others who are not interested in the prospector and winter traveler, to say nothing of the Indian, all of whom must have their dog team.

"Sign?' No! Let the cannery get out of the Yukon, as is the Government orders. The cannery will still be allowed to fish five hundred yards out of the mouth. This is good enough for shem, but to allow them to remain in the Yukon means suffering and deprivation in time-to come. both to the natives and to many of our sourdoughs.".

Bert Eldridge, in the Doughnut King, left yesterday morning for Berry Landing with a load of freight, consisting of outlits for Blackburn, Eldridge & Goebel, John-O. Strand and others.

Develop ent of Kantishna Is Retarded By Lack of Transportation

Nenana News.

Lack of roads in the Kantishna district are delaying the commencement of hperations on at least two big placer projects a whole year, according to J. C. Van Orsdel, head of the Mt. McKinley gold placers, who has just arrived in Nenana from the properties of his company in the Kantishna. "If we had had roads," said Mr. Van Orsdel, "we would have been operating on our holdings by this time, but as it is, the commencement of our work has been delayed a whole year. And the same is true of the Sutherland-Howell hydraulic project on Moose creek.

The Van Orsdel holdings are twelve miles from the Bearpaw river, and all of the hauling thus far done has been accomplished with the greatest difficulty imaginable, through a low, swampy country, and without even the orudest sort of a road. The work was such that it finally had to be abandoned altogether to await the coming of snow.

Dr. Sutherland and his associates have a haul of thirty miles from the Kantishna river, at Roosevelt Landing. Considerable money has been expended on road work in that locality, but the road between the river and Moose oreek is impassable now, difficult of negotiation even for a pack train. It is a good winter road, but absolutely unfit for summer use. The result is that the hydraulic operations on Moose creek. caunot be started before next summer.

Besides these comparatively new placer projects, there are a considerable number of hard rock propositions. rich in ore but undeveloped because of the lack of roads. Many of the properesties were located years ago, and the agitation for road work has been loud and continuous, but without avail. Nothing was ever done in that district in the way of road building until a small sum was obtained from the Territory to start a winter road from Roosevelt, and the Kantishna oldtimers feel, in view of the showing made by them, that they have not been treated with fairness."

The Northern

New York.—Manhattan island, once sold by an Indian for \$24 and a few drinks of firewater, has become so valuable that a tipy plot stretching only 31 feet along Broadway recently was leased for an annual rental of about \$133 a square foot. Real estate men declare this is the highest figure for which land was ever rented here.

The site is at Broadway and Thirtyfourth street, and extends about fifty feet along the latter. Several years ago a department store wished to buy the corner lot, having procured the land on both sides as the site of a skyscraper. But the owner would not sell, even for a million dollars, and the big store had to erect its home around the small building.

A four-story structure, housing on the ground floor a busy cigar store, still remains on the valuable corner lot, and on all sides lofty buildings rear their bulxs of steel and stone. The new lessee, who will pay \$3,000,000 for rent, taxes and other expenses over a period of twenty-one years. plans to erect a narrow skyscraper on the triangular plot. A candy-making corporation will occupy the building.

Twenty years ago Robert S. Smith, who owns the property, sturied realty men by paying \$387,000 for the land, which has only 1.250 feet of area. He had come to America with only \$5.75 from his native Russia in 1880. When he bought the property he was told such a small strip was not worth the price and could never be profitable. Within a few bours after the \$3,500,- **W. F. G**r M. 1

Bids May Be Asked for Summer Mail Service Via Menchumina.

A telegram from Hon. Karl Theile, Surveyor General of Alaska, addressed to R. S. Boyd. of McGrath Commercial Club, in response to a demand from that organization for a better summer mail service, gives every indication that a mail route will be established of rem Nenana to McGrath during the coming summer season, as outlined by THE TIMES some months since Following is the telegram:

Juneau, Dec. 17.

R. S. Boyd,

McGrath, Aaa.

Re your letter November 10th, have taken same up today with Governor. Bone and Homer Elwell, chief clerk of the Alaska section of the United States Postofficer We have recommended same to Hop. WILLIAYS, Postmaster General, Think bids will be called for very shortly route-from Nenana to McGrath, as per your suggestion.

THEILE.

THE KUSKO TIMES WEDNESDAY, FEBRUARY I,

MAYBE NEW TO MINERS MAIL TRAIL

Road Commission Party Coming From Lignite to Berry Landing.

For some time that reports have been current that 's' reconnoisance party of the Alaska Road Commission, headed by Superintendent Hawley-W. Sterling, was working from Lignite to this section, the avowed object of the work being to determine the feasibility of a mail route to McGrath. Uefinite information of the foregoing is found the following from the Nenuna in News, of a recent date: .

"Spperintendent Hawley W. Sterling of the Alaska Road Commission, who arrived in Nenana from Fairbanks yesterday, accompanied by Mrs. Sterling, is headed for Herry's Landing, on the East Fork of the Kuskokwim river, on an extended reconnoisance survey, for the purpose of determining on the feasibility of establishing a winter mail trail from Lignite to the Kuskokwim, as against the present winter mail route to that region from Nancy. on the Government railroad, by way of Rainy Pass.

01-FEB-22

"The distance to be covered in the reconneiseance; from Lignite to Berry Landing, is approximately 210 miles, and will consume considerable time. Mr. Sterling, who will be accompanied by Mrs. Sperling on the long tripacross country, expects to leave for return to Nenana, on completion of the work, about the beginning of April

"Tents, supplies and other necessities for the use of the party have gone forward, and two caches have been established on the Toklat and at Roosevelt. Several more loads will be sent out and Mr. Charling armonte to take the

Winter Trail Will Be Built Between Tacotna and Ophir

We are glad to announce that, according to W. W. Lukuns, the Alaska Road Commission representative here, the Commission has authorized the cutting of a winter trail between Tacotna and Ophir. This trail will parallel the Government's wagon road leading down Butte and Independence creeks. It is a much needed want and will surely be appreciated by the general community.

The Commission further approves of the work necessary to allow freight being winter-hauled over the so called government trail between Mixon Forks and Tacotna. At times, due to varying conditions. Tacotna, merchants are compelled to warevous supplier at the Forks, the same being delayed through early freeze up or lower river transportation difficulties. Consequently, this work is decessary and is money will spent.

Could used from Page 1). and very solive dogs as and mis after carbou and means and broke their aleds accessitating a long delay. Almour is known all slong the Yuken from Si Michael to Tenace as a hardened and very efficient mall carrier for a number of same and as Armour was secompanied by a John Montan, who Mr. Hill says is an experienced modeman, bunter and trapper, with his own separate team, is seens impossible that anything very serious could have happened.

Speaking of the route, Mr. Hill says it is a wonderfully level, fine route. His only difficulty sfler the rivers fraze up was, locating, the, trail from Minchumins to Telida. There was no track, and at every swamp and lake time had to be spent determining the proper continuation, and at times it took hours, and, once days, to find it. Ode of the greatest difficulties arose from the many trails partially out and blazed by trappers. At one time Mr. Hill followed a trail two days, only to find that it wound up at a fallen-in trapper's cabin. It took him another day to go back to Jerne, and another to locate the right trail. He says that, now that he and Jerne have found it. there will be ao further trouble. Billy O'Palke and Fred Whitehead have also gone in along it.

There is no stretch of over 21, miles without a cabin, cooking stove and cooking utensils, and at least at times occupied by natives, except between Telids and Lake Minchamins, a distance of not to exceed 50 miles, and Mr. Hill expects that a roadhouse will be started there very soon. There is a good roadbouse at Big river, with dog stables; an Indian conducted at Nicoli, 21 miles further, with dog Houses; a cabin at East Fork, 9 miles from Nicoli, and at Slow Fork, 21 miles further. At New Telkis, 18 miles from Slow Fork, is a village and mative roadbouse. Mr. Hill says both native houses are kep very clean and the meals are better than in many roadhouseered by whites. The rates are \$1.50 per meal, west and of Minchbains, not miles from Telidar Old Andrew, a

Forta Nice Lunch or First-Class Meal

Il yes and the set of where Bob Dunimore use a roadhouse Fifteen miles further is Diamond City: Mr. Oleon Tune the road house there and it is 30 miles from there to Khight's roadhouses, which is 26 miles from Kobl. There is a cabla and stove about half way between Diamond and Knight's, and between Knight's and Kobl-Mr. Hill mys that with very little cutting and marking between Telida and Menchuchina is would leave the worst bis of trail on the route. As far as MoGrath, that between MoGrath and Big river. Catilog is however. very necessary. Mr. Hill and his mon cut oul the trait laid Det by the Road Commission directly from Dismond to Roosevels, and cost horses and double enders to Econavels. The distance is simost the same as

The distance is almost the same as that to Nancy, but the biggest elevation is not over 900 feet above sea level, Diamond being 570 feet above by the Government maps. Also, the new route is out of the violent snow belt. The snow all the way is about the same as at McGrath.

Mr. Hill says that he had expected considerable delay with the first mail, which, owing to Armoer missing the trail, fell upon the second Also, Armour's difficulties may seriously interfere with the third and fourth mails, but after that he expects to be regular and expeditions

and expeditions - Owing to the fact that there is no posthouse between Thids, dud Misohumins, MF Hill advises servelars in stay of the new trail new two days yet, though the expects to but a test at some convergions place perperartly for the use of the mail. Also, owing to the fast that this contract was gut lat. If about the piddle of September, for feed is very scarce along the route.

Trail Work for Season Ends at Taleido

Carlo Carlo

Sam Sanderson. superintendent in charge of the opening of the new trail between Kobe and McGrath. arrived here Thursday to attend to a few business matters.

Mr. Sangerson reports that the Road Commission force got as far as Taleido in the making of trail, at which place work for this season has been discon tinued. He is quite enthusiastic over the trail, and reports that a gain in distance of eight miles has been made between Glacier and Taleido.

Mr. Sanderson, on leaving yesterday for Big river, had a cyclometer working in the trail of his sled, which will be run from here to Kobe. when practically accurate mileage will be determined.

Electricity's Source May Be Discovered

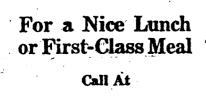

Washington.-Scientists of the Carnegie Institution have developed an instrument which measures the elec tricity that comes to the earth from the invisible universal dynamo, it was announced vesterday.

The instrument, or a further development of it, may eventually locate the source of electricity, it is believed. It is the work of Dr S. J. Mauchly and H. W. Fisk, of the department of terrestrial magnetism of Carnegie Institution.

By means of the instrument' greater accuracy in determining the apparent variation of the north magnetic pole is possible. The indicator of the finest compass now points 30 degrees west of true north. The variation has totaled 20 degrees in the last 64 years. This variation is not of the magnetic pole itself, but is the effect on the compase of electric waves or rays moving toward the earth.

The distance from here to Big river is 24.7 miles, according to the cyclometer used by Sam Sanderson in going over the trail from here. yesterday.

Frank Beckman was a Sunday arrival, coming from Carl creek, to which he returned on Monday.

185 Estimated Dead

Dawson, N. M:--The total number of dead at the Cumberland mine disaster was estimated today at one bundred and eighty-five. Many bodies are being recovered.

There are no new developments in the matter of that missing mail sack.

S. T. Piakhain, postoffice department representative, left Sunday for Tacotna, on his way to Iditarod, being accompanied by Deputy Marshai Mo-Mulleo. Arriving about the same time at Tacotna were Postal Cferk Wetzler, of Fairbanks, and Deputy Marshal Jack Woods, of Ruby. All parties, it is un derstood, were in conference for several hours on Monday.

Yesterday, the 13th, marked another milepost in the life of Dr. and Mrs. W. F. Green, it being the thirty-ninth anniversary of their marriage. A number of callers paid their respects during the day. Pleasant features of the day were the presentation to Mrs. Green of a most artistic nugget bracelet, besides which each was the recipient of a handsome Pioneer pin. gifts of a number of friends.

Owen Gray arrived this afternoon from the Nixon mine, bringing down R. M. White, asting superintendent at the mine, and Z. E. Foster, coming from Big river, and lately with the crew of the Alaska Road Commission in trail work between Kobe and Taleido.

L. B. Walbridge, R. T. Higsh and Ben Galiatin, all of whom are connected with the Tuluksak Mining Company, on the lower river, arrived here Sunday forencon from Tacotas, and left the same alterncom for Big river, on their way to the Outside.

Mail Carrier Beattle, stringing the Outsida mail, arrived yesterday from Big river, leaving this morning for Tacotna.

Dr. D. C. Hardy, dentist, arrived at Tacotna a couple of days ago, having been piloted over from Ruby by Scotty Clark.

L. B. Loomis, N. C. manager, returned yesterday from a three-days' business trip at Tacouna.

Mrs. E. P. Werner left yesterday for a short visit at Tacotna, going up with Jack Mutchler and team.

Adolph Jestland, from out Nixon way, was among today's arrivals.

MCGRATH, ALASKA, APR 21, 1923

Mrs. Boyd Writes of Trail Trip to Kobi

Kobi, April 2.-We made Kobi in eight and one-half days, and have had a most pleasant trip, so far as weather and trail had anything to do with it.

We made Big river in five and onehalf hours, to find Dick Rhodes his usual genial self, and he certainly furnished the good eats in plenty.

Leaving Dick's at 8 a. m., the 27th, we reached Nicoli at 2:30 p. m., only to find the native roadhouse absolutely filled with returning old-timers. We decided to push on to East Fork cabin, a distance of eight miles, where we camped with big Ed Jerne.

From East Fork cabin we easily made Slow Fork, where a native keeps a fairly good roadhouse; though sleeping room was at a premium even on the floor.

From East Fork to Slow Fork we had our worst trouble. The trail was soft. and one whole side would give way. and our load would topple over into three or four feet of show. We had a perfectly good hand-ax and a pair of skils, so we had obly to set to work. dig it out and build an incline to the trail, stamp it down with our feet, tug the sled around-did you ever try to lift your share of 800 pounds?-then start the dogan Sometimes we didn't fall-back more than three or four times before we made it.

The Slow Fork stop proved an excit-· ing one for us, and it was here that we received a lesson in early rising. party of mushers came in, and one of them wanted breakfast in time to start at 4 a. m., but the proprietor opined that 6 o'clock was plenty early. Howroadbopse, keps by E.K. Kammisrard. three-room building already ere and dorhouses in process of erection. As his place is right on Lake Minchumins, which is swarming with fish. there will be no question of fish shortage dext winter.

From the Lake Home we made Roosevelt, lunching at another cabin of Joe Wills, whom we met on the way. At Roosevelt, Bob Desemore has two cabins fitted up as cook and bunk house, and is serving fine meals. He also intends to build.

Nenana, have a small trading post at | ed States. Surveyor General of said Roosevels, and a building is in course | District was | United States Mineral of erection which will be occupied by Mr. Rodman, an old-time stader from Gibbon, as a trading post.

From Roosevelt we lunched at Diamond, where E. Hadsen has a cabin follows: fitted up to accommodate travelers, and he intends to build as soon as he is as sured of the trail's permanence.

From Roosevelt-we made a Government cabin, where we camped with four old-timers. They stated that the Kobi trail is, or always has theen, operfectly safe until May 1 or later. One of them traveled is fast year between May 5th and 10th. The earliest creek. to open last year was a small one which broke up May 19th, and which in no way affected the trail. They said that, of course, toward May 1 there were apt to be overflows, but no worse than any spring trail, and absolutely nothing dangerous.

Twenty-seven miles from the Government cabin is Knight's, which we made by 2 o'clock that afternoon, but decided to stay over night. At this place Henry Knight has a fairly good roadhause, good stables, dog burns, Knight's to Kobi le 26 miles, where we arrived shortly after neon today. There is a government cabin half way between these last two places, fitted with stove and bunks.

At the cabin 27 miles from Knight's a roadhouse is already under construction. There are spiendid locations for loadbouses at Wills' cabin and at any of the native-kept places.

The trail this way from discessed; is somewhat cut up by the deavy handing with horses, and is ever rolling ground, but there is not a fast of the trail that I couldn't have driven my own team over in perfect safety. The only open water I saw were several small streams which were babbling along as if it were July, but they came from warm oprings and are safely bridged.

The approaches and onds of the pertages are, some of them, quite-scorp, ever, others told him he must do as his but doubtless before another year will patrons wanted. He went to bed with be graded down property. Withou we

No. 1eight and one-half days, and have had | Kobi trail is, or aiways one seeus a most pleasant trip, so far as weather and trail had anything to mith it.

We made Big river in and onehalf hours, to find Dick Rhodes his usual genial self, and he certainly furnished the good cats in plenty.

Leaving Dick's at 8 a.m., the 27th, we reached Nicoli at 2:30 p. m., only to find the native roadbouse absolutely filled with returning old-timers. We decided to push on to East Fork cabin. a distance of eight miles, where we camped with big Ed Jerne.

From East Fork cabla we easily made Slow Fork, where a native keeps a fairly good roadhouse, though sleeping room was at a premium even on the foor.

From East Fork to Slow Fork we had our worst trouble. The trail was soft. and one whole side would give way. and our load would topple over idio three or four feet of spow. We had a perfectly good hand-ax and a pair of skils, so we had poly to set to work, dig it out and build an incline to the trail, stamp it down with our feet, tug the sled around-did you ever try to lift your share of 800 pounds?-then start the dogan Bometimes we didn't fall back more than three or four times before we made it.

The Slow Fork stop proved an exciting one for us, and it was here that we received a lesson in early rising. A party of mushers came in, and one of them wanted breakfast in time to start at 4 a.m., but the proprietor opined that 6 o'clock was plenty early. However, others told him he must do as his patrons wanted. He went to bed with a grant that convinced all yresent that 6 o'clock would be the breakfast hour. So when an alarm awoke the echoes a few of us crawled out. A few minutes "Bylybod op! One bleakias" this house!"

Everybody "opped." After breakfast someone looked out and announced, "Great Scottl it's as dark as pitch!"

A general consultation of watches followed. "Well, I'll be blowed," said Bill Goes, "it's only half past three o'clock!"

The early rising musher adjusted his pack and with a grin of triumph departed, leaving a crowd of rather silly looking mushers shivering around the stove-all says Bill Goss, who calmly returned to his bunk. When slightly reprimanded the readhouse keeper said: "You speak early; me ketchum early."

From Slow Forke we made Telido for lunch, where Sergie and old Wassalel's daughter, keep arswo-cabin roadhouse. That night, the 28ths we stayed at Joe Wills tont, where five of us camped in a tono Mada

. Fiem Wills' sont we made, the La

fectly safe until May 1 or later. One deg. 47 min. W. 681.7 ft. to Cor. No of them traveled it fast year between May 5th and 10th. The parlies of ÷ to open last year was a email one which broke up May 10th, and which in no way affected the trail. They said that, of course, toward May 1 there were apt to be overflows, but no worse than any spring trail, and absolutely nothing dangerous.

Twenty-seven miles from the Government cabin is Knight's, which we made by Zo'clock that afternoon, but decided to stay over alght. At this place Henry Knight dias a fairly good roadhause, good stables, dog barns, more and serves good meals. Prom Knight's to Kobi is 26 miles, where we arrived shortly after acon today. There is a government cable half way between these last two places, fitted with stove and bunks.

At the cabin 27 miles from Knight's a roadbouse is already ander construction. There are splendid locations for loadhouses at Wills' cabin and at any of the native-kept places.

The trail this way from Rossevelt is somewhat cut up by the heavy . handing with horses, and is ever rolling ground, but there is not a fast of the small that I couldn't have driven my own team over in perfect cafety. The only open water [saw were several small streams which were babbling along as if it-wore July, but they came from warm oprings and are safely bridged.

The approaches and code of the portages are, some of them, quite steep, but doubtless before another year will be graded down properly. Withon we came to one I bore down on the brake and pulled up on the handlebars, according to the pilot's instructions, antil I folt my and of the sled leave the later the proprietor hammered the ground, when I closed my eyes, comfloor with his heel and announced; mended my soul to its Maker, and hung on. If we dit the trail my teeth were only jarred half through my head, and if we didu's-well, .I had a good obance se start an argument.

At Kaight's, Jim Burnne, the game warden for this district, erent the night. He is continually traveling, and inclute that the trail will be good until May 5 or Jater. He shinks that the trail will result is some good strikes, as it goes through a shighly mineralized country.

My regards to every one.

THE KUSKO TIMES, SATURDAY. AUGUST 25, 1.2

Section Brought to

an End by A.R.C.

Makes Caustic Retort to British Reparations Note.

Paris: Aug. 23.-The fifth reply of the government to the recent British repanations note asserts that France refuses to withdraw from the Ruhr except as she is paid, and that she likewise rejects a plan for an interternational re-estimate of Germany's capacity to pay. Referring to the British; allusion of the "rights of others, the reply said that,"France does not need to be reminded of her duties."

Robert Gherkie, headed for Tokotna, left Bethel on Wednesday, traveling in hie own boat. Accompanying Mr. Gherkie as far as McGYath is Fruderick Anderson, wireless operator, who will relieve Sergeant L. W. Bundy at that station.

The Thor left Wednesday for Mo-Grath with the following passengers: Frank Guskey, Warren Stewart, Dao Callahan, Wm. Molyneaux, M. Bozich, Jack McDonald, Jim Abans, H. Wallick, Wm. Hummel. 'W-m. Cline, Miss Dora Werper.

Alex. Gragen and Frank Deeming, who arrived Monday from the Road Commission camp, left = Tuesday for Candle, returned here Thursday, and departed yesterday for Ruby.

Bill Hummel, who made the trip on the Thor Wednesday to McGrath, took the overland route back on Thursday, making the distance in eight bours.

T. F. Roberts, who came in from the Road Commission; camp on Monday, left Wednesday for Öphir, on his way to Ruby, Nenana and the cost.

Miss Dora Wornemafter a visit of a few days here, the guest of Miss Frances Eurson, laft, Wednesday for her home at McGrath.

The steamer Tana, according to the best information obtainable, will leave McGrath-for Bethel about August 28th.

Jack Brandon, why returned yesterday from a trip to Candle and McOrath, for Iditarod.

All work under way on the Government roads by the Alaska, Road Commission came to a stop last Saturday evening, the reason for its discontinuance apparently being lack of funds. Aside from wiping out a number fof gaps existing in the first sevenimiles out from Tokotna, the Tokotna-Ophir highway during the present season has complete for a distance of eleven miles, and is said to be in passable condition for one mile beyond, this latter mile as yet hardly being usable for automobiles.

The Tokotna-Tokotna Landing road work; upon (which commenced several weeks ago, will have to wait for another year before receiving its finishing touches, aithough another ten or eleven days' work would have completed it. This road, when completed. willibe about two miles long. One mile of the road has been completed; and of the remaining mile about 'threefourths has been corduroved, mossed, and bridges and culverts put in.

John J. McGrath, known in every Alaskan and Yukon camp. former editor of the Nome News, Nome Nugget, Seward Gateway and other Alaska newspapers, dropped dead of apoplexy In Brooklyn, N. Y., several weeks ago, while visiting an aunt, according to reports received in Alaska. At the time of his death he was associated with a Florida newspaper. The deceased leaves hundreds of sourdough friends in the Territory, and during his business years in Alaska was considered one of its ablest journalists.

Warren Stewart, who arrived from the Road Commission camp on Monday, was a Thor passenger for Mc-Grath on Wednesday.

Jack McDonald, who returned Monday from a few. days' visit at Ophir, left Wednesday for McGrath, going down on the Thor.

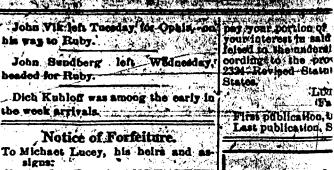

Mike Roki, one of Monday's arrivals, left Tuesday for Ganes.

Ed Nollette, of Yankee creek, was a town visitor Thursday."

Tony Butorac returned Thursday from a trip to Ophir.

Axel Peterson left Monday for Little creek and Ophir,

Frank Righini left Tuesday, headed

You, and each of you, are hereby notified that we, the undersigned, your co-owners, have expended in labor and improvements the sum of not less than one hundred dollars for the years 1920 been extended for a distance of about and 1922 upon places mining claim No. five miles. The road is now practically 5 Above Discovery on Moore creek, in complete for a distance of eleven miles. ing precinct, Territory of Alaska, in order to hold said claim under the provisions of Section 2324 of the Revised Statutes of the United States and the amendments thereto concerning annual labor upon mining claims, being the amount required to hold mid mining. claim for the period ending June 30/ 1923.

And if, within ninety days after the publication of this notice, you fail or refuse to contribute your proportion of said expenditures, as well as the cost of recording the same, and the costs of this advertisement, your interest in said claim will become the property of the undersigned, your co-owners, who have made the required expenditures under the terms of said Section 2324 of the Revised Statutes of the United States.

KELLER & DAWSON, Co-Owners, By J. F. Keller.

Date of first publication, July 21, 1923. Date of last publication. Oct. 20, 1923.

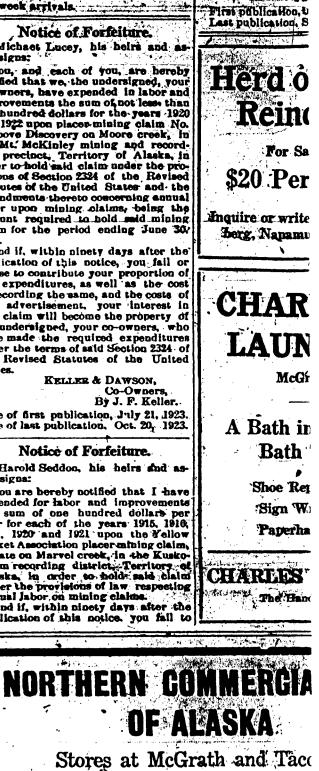

Notice of Forfeiture.

To Harold Seddon, his heirs and as sigos:

You are bereby notified that I have expended for labor and improvements the sum of one hundred dollars per year for each of the years 1915, 1916, 1917, 1920 and 1921 upon the Yellow Jacket Association placer mining claim, situate on Marvel creek, in the Kuskokwim recording district. Territors of Alaska, in order to hold said claim under the provisions of law respecting annual Jabor on mining claims. And if, within ninety days after the

Absolute Necessity of Highway From Ruby to M'Grath

in town Tuesday night, after completing a ten-days' mush from Ruby over the embryo road of the Alaska Road Commission. From Ruby to Long in Milligan's de luxe touring car over a stretch of road twenty-nine miles in length was accomplished in one hour and thirty minutes. From Long to Poorman, thence to Lene Mountain and on to Cripple took several strenuous days of mushing. Following the winter road from Greenstone, seven 'miles beyond the town of Long, the trail and road which looms up so enticingly on the Doad Commission map, becomes a nightmare of swomps, niggerheads, lakes and almost in passable sloughs, over and through , high progress of any sort was a slow and tedious task. The heavy rains which began falling from the time Mr. Camp left Ruby continued throughout the entire trip, causing the streams and rivers to run bank full and submerging the trail and road a foot deep with muddy water.

From Cripple City the travelee left the winter trail and, going have the Cripple diggings, took the Tammer trail to Ophir and thence to this place. "The absolute necessity of a real road between Ruby and Tokona and McGrath," 'said Mr. Camp, "becomes more and more a vital necessity for the future development of this section of Alaska. Cheaper and better transportation must become a reality before Tohotna, McGrath and other itowns along the right-of-way of the road, which should have been built ten years ago, can thope to become permanent and prosperous communities. The Alaska Road Commission officials cannot fail to see the necessity for this road, and it is to be hoped that they will concentrate their road-building activities in this section of Alrska en-

tirely upon the Ruby-McGrath high way from now (until it is finally comlanes, left this morning for pleted, which should be accomplished in two years. By appropriating a sufficient sum of money for the completion of this read within the next two years, the people living in this section of Alaska will be benefited as much as those people along the right-of-way of the Alaska Railroad.

transportation. Cheaper transporta- leave tomorrow for Spruce.

F. B. Camp, of Anchorage, arrived (tion means an increased population, and an increased population means the ultimate finding and development of more camps like Iditarod, Ophir and Poorman," said Mr. Camp. "The people located along the right-of-way of bath the wjot of eummer highways connecting Ruby itil McGrath are all waiting patiently for the completion of this road and are becoming more impatient with the apparent unnecessary tardiness of the officials of -the Alaska Road Commission in completing this road. The recent visit of Delegate Dan Sutherland to Poorman and other points along this proposed road will undoubtedly help to get early action, and if all those people vitally interested in this road will write to' Delegate Dan urging him to make a special effort to have the road completed at an early date, much good will result. A united effort and one voice demanding this road will do much toward getting it in the near future."

> Aside from being an able newspaper man, Mr. Camp, who saw service during the world war, enjoys the distinction of being known as the Soldier-Poet. He has become somewhat widely known through the publication, recently, of a volume known as "Alaska Nuggets," of which over seven thousand copies were sold. His verses are of a high order and decidedly pleasing. Mr. Camp departed Wednesday for McGrath on a business mission.

> Mrs. S. Schultz, Tokotna's first school teacher under Territorial supervision, arrived here Thursday. Mrs. Schultz, who carries excellent credentials concerning her school work in both North Dakota and Montana, is eager to assume her new duties here. Until such time as the new school house is ready. the contract for which was awarded several days ago to John E. Baker, school sessions will be held in Ploneer Hall, opening Monday morning next.

Mrs. James Weir, well known Ophirite, after an absence of about two years among childhood's scenes at her old home in Scotland, was among Thursday's arrivals, on route to her home on Spruce creek. Mrs. Weir was met at e Alaska Railroad. "A good road means much cheaper nied her here, and both will probably

ROAD WORK PAST YEAR f . .

Resume of Activities of **Commission in This** District.

Ross E. Kinney, summarizing the work of the Alaska Road Commission in this section during the past several months, points out the following results:

"A new trail has been completed via she Crooked creek placer diggings and Medira to the East Fork roadhouse. from about Mile 16 on the McGrath-Big River trail. The new trail is estimated to shorten the distance from Mc-Grath to Medfra by four or five miles, and puts the new postoffice of Medfra on the mail routs. It also eliminates five river crossings to Medira and four to the East Fork from McGrath, and avoids all river travel. A four-borse seam and bobsled traveled over the new trail from Medfra to McGrath the next day after completion.

"The new trail shortens the distance over the old route from Eagle creek (Strand & Clough's claim) to McGrath and return by thirty miles, and furnifhes a fair summer and early fall route for mushers from McGrath to the East Fork roadbouse, having only one river crossing, over the main Kuskokwim, about two and one-half miles above Medira, and one slough. Friday and Kagle creeks are both bridged. The new trail, with only one low saddle, and no hills to climb, is located through green timber for practically

THE KUSKO TIMES, SATURDAY, NOVEMBER 1, 192

"ay" you will be hollering your heads [elected-only for your better protect off shortly thereafter.

I am country sestost (or they are running egainet me) three men of in the race (just this much). whose personality and ability I shall say nothing. Murray C. Smith, the republican nominee, is a fine type of a man, but his electioneering pamphlets give as his idea of the way, to prevent the rape of the Territory by Juneau to "conciliate" them. I do not know the meaning of thac word, when confronted by holdup artists. They have shown their hand, and are out to cut our representation in two, which would mean the cutting of our natural appropriation in two. The only conciliation they are entitled to should be administered with a double-bitted axe.

The democratic candidate, Harry E. Pratt, is an able lawyer and a fine voung gentleman-a scholarly young man. He would obey your wishes if you elect him, which is according to the rules of the game. I cannot promise te do that-I would "obey that impulse," and "do it now," on the minute the contingency arose. Unless you believe that I, at 60. with a practical political experience in two countries and | Jerry's to Shermeyer's roadhouse_ most all states, know what to do in any event I am apt to run up against at Juneau, you should not vote for me.

The third candidate, also independent, I have never met to know him. They tell me he is a good speaker and a live worker. I do not come in either class I am a good listener and a good undor-cover worker, which latter qualification has enabled me to be the sole support of on average of fourteen people' for the past thirty years and the indirect support of about 11,000 people.

Politics is a game that no sensible man in this day and age need take seriously from a party standpoint. Politics has had the whole world fooled-all save the politicians on the "inside," looking out and enjoying the passing show. But, with reapportionment coming and this division due to lose what is its own, and to Juneau. it is up to you to have a little sense and send the safest and sanest and most experienced men you can get to the next session. And if the "experienced" men have not in the past gotten results at Juneau as they should, then your experience with them should be enough to keep you from again committing the crime against your own interests of "sending boys to mill." We sent our boys out last session to get needed money for the College; they waited until the last minute of the session and came back with half they went after. They are not 109 per cent good workers.

As I tell you, I am not anxious to be

tion at Juneau. In fact, I am sorry that I "spoke" last winter, Still, I am Sincerely,

W. F. THOMPSON.

Juneau, March 13, 1925.

Mrs H. H. Ross. 18.00

Territorial Legislature, Juneau, Alaska:

5

My Dear Mr. Ross-Receipt is acknowledged of your letter of the 12th Inst. with reference to survey of the portage between Lake Minchumins and the Kuskokwim river; also accompany ing letter from Peter McMullen with sketch and olipping from The Kusko Times: Also letter from W. J. Widman of MoGrath and accompanying letter concerning correspondence between the Schwabacher Hardware Co. and the Innoko Lumber Co.

In reply I have to advise that this examination will be made during the coming season in order that we may determine just what improvements could be made to the portage and the approximate cost thereof.

One of our primary functions is the assistance in the way of trail construct slog in order to expedite the U.S. mail service. We are always prepared to make such examination and are also prepared to stake or, otherwise fix up suy trail designed to be used by the Postoffice Department for the delivery of the Interior mails.

Very truly yours. (Signed) JIS. G. STEESE, President Alaska Roud Commission.

New York .- Rabbi E. B. M. Browne, head of the American Jewish seventy elders, was arrested yesterday on complaint of Calvin Coolidge, Mrs. Coolidge and Frank Sidarns, accused of an. noying the President by demanding \$12,500, as hall of the sum the American Jewish elders spent in campaigning for Coolidge last year.

Browner who is 72 years old, produced letters from Presidents Harrison, McKinley, Receivelt and Barding, Bad was purbled from custody.

Becret service men testified that the Coolidges and Beerns asswered mady

Dredge Will Operate On Rear Class Lower Kuskokwim, in 1026

R. T. Binch. at the bead of opera slope of the New York Alaska Gold Mining Company, was a Mooday ar-rival, on route to the costigacy's workings, on Bear creek.

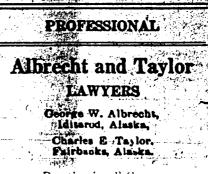

Coming up on the W.H. Bupper, Captala Laorley's new boat, will be the material for the dredge to be installed on the company's property. This dredge, according to Mr. Hirson. will be of the screen finme type. with four foot buckets, and capable of dig-ging eighteen feet. From its water terminue, the dredge will be bauled nezs winter to Hear creek, where it will be assembled in the spring and placed in early operation.

Speaking of the New York-Alaska Company and its projected operations, the Alaska Weekly, Seattle, savs:

"The New York-Alaska Gold Miolog Company, which controls a large area of placer ground on Bear-creek, a trib utery of the Tuliksak river, do the Lower Kuskokwim country, will sinstall one, and possibly two dredgers on that stream this season. For the past four years the company, under the direction of General Miscager Walbridge and Mining Engineer Hirsch, has carried on exploration work. employing drills in the operations. The results have been satisfactory, indeed better than expected, according to reliable information.

"The New York-Alaska-Gold Mining Company has been Enanced entirely in New York city, and the bead office of the concern is incased there. After acquiring the property, under option, Mining Engineer Elirsch was sent to the scene, and soon thereafter drilling morstlons began. The ground has now been sufficiently proved in justily the installation of one, and possibly two dredges, this season."

Also arriving here with Mr. Birsch, un their way to Bear creek, were But ers Martin assistant engineer. and Merwin Anderen, of Fairbanks, all of whom, after a short stay here. left for Opbir, on the way to their destination.

CONSIGNE Save Road DODER WIDE CORpleted Present Season

In a letter recently received from Dan Satherland, Delegate from Alaska, he mestions the subject of road construction in the interior of Alaska. The following paragraphe is of particular interest:...

"I have taken up the matter of the Long Tokeina road with Colonel James G. Steepe, recently, and he informed to that there was about \$35,000 spons on the Tocotha end of the road this part season. - He tells me that is his intention to fully complete the read into the town of Ophir Herr staton, and t is his purpose to spend at least 835. 000-on-that and of the project, cand somewhat more provided he obtains an increase in appropriation from Oba gress. Is have been arging the en larged allutment for this project for some time, as It believe that if this road could be completed from either end-into the Orippie -creek/couolry it would bring about considerable "plecer and perhaps quarta-mining development. I have long believed that in the unfrozen ground on Cripple there must be some good placet deptielts; but believe a drill will be required to dem-"metrate values."

Thw dance at the Larson & Clough Roadbouse last Saturday evening was voted by everyone present the best of the season. Duncing to the Lowrie musio started at 9=0'elost and con tinued worth 3% m. The Cloughs kept an excellent buffet lenets ready for anyone desiring to pertake of mme.

SUPT. CARL LOTTSFELDT TLS OF WORK DONE FOR

....

the Alaska peninsula, which occupied petitor, returned to Kanatak, got into a period of nearly two months, Carl a poker game with a party of men. cently to compile his report for the amount he had paid the trappers for Commission. Lattsfeldt made an in- their furs. spection of winter trails and shelter Two other buyers were on the trail cabins constructed by the Commission together, it was said, when differences in the Kuekokwim and is the first off- arose, chiefly over an axe. One had cial to undertake such a mission in two axes, while the other had none.

Lottsfeld's sttention was the reloca. cost having been \$2.50. A fight among tion of a 36-mile winter trail between, their dogs finally, terminated what Fist and Holy Cross. He and Inde-1 night have resulted in a similar fray gaid also placed mile posts from Telida to Flat."

Four new shelter cabins were constructed in the Kuskokwim. country. last fall-one on the Iditarod-Shagluk trail at the Little Yentne river, the second at the foothills on the Tuliksak-Bear creek trail, and the third and fourth on the trail between Apokak-station and Quinhagak

The winter trails and the shelter cabins are all in good shape, Lottsfeldt told the Juneau Empire

Lottsfeldt and Indegard left Takoina November 30 last and followed, and will return this spring to continue the regular trail across - country, going through Flat and Holy Cross and down the Yukon river to PPaimute, across the portage to-Kaltshak on the Kuskekwim river. From that point the trail goes down the Kuskokwim river to Bethel; thence along the coast to Good News Bay, on to Dillingham, thence to Naknek on the Alaska peninsula, and on to Ugaguk, up the Ugaguk river to Bacharof lake and thence to Kanatak, where connections are made with the steamer Starr for Seward. They reached Kanatak January 17. Christmas day Lottsfeldt and Indegard spent in a shelter cabin on Indian river, between Good News Bay and Quinhagak. This new substance is made of cement Their Christmas dinner consisted of and sand, like any other concrete, but beans and deer steak. New Year's evel it differs greatly from ordinary conthey were "siwashing" it in a snow crete in that it has been made exhank on the trail.

The season is one of the best for trapping red for that has been known in years in the Kuskokwim country, according to Lottsfeldt. Some of the honeycombed evenly by the tiny Indian trappers are catching as much as one fox every day. Prices are reported to be very good ...

shipped on the steamer. Stars at Ka- porousness of this concrete can be acnatak on the trip last month, Lotts- curately determined in advance by the feldt stated, and the entire fur shipment made from that point was said quently the weight of the material is to aggregate about \$50,000

comical incidents occur in their work. THE KUSKOKWIM REGION Two buyers were said to leave Kanatak at the same time with dog Having completed s. dog team trip teams racing for the same objective. ef 980 miles-through the Kuskekwim, and one, on discovering that his dog country from Tskatna to Kanatak on team was bested by that of his com-E. Lottafeldt, superintendent of the including trappers from whom he had Alaska RoadoCommission in the Kus- purchased furs, and won a large sum kokwim country; arrived in Juneau re- of money, among which was the

 It was said that on another occasion a fur buyye who preceded another on he trail told the Indians as he passed word that the man following him was a probibition agent, with the result that the Indians took to the hills and a u.fortunate and unenlightened Juyer had difficulty in securing even dog feed, let alone a cargo of furs.

Lottsfeldt has been superintendent in the Kuskokwim country for the Alaska Road Commission some time his work. The chief operations completed last summer, he said, were the completion of a three-mile road between Takotna and Ophir and construction of an additional mile and one-half to the Little creek road to the Ophir mining country, serving the Flume Dredging Company and stveral smaller operators in the Little creek district.

ICE CONCRETE" A LATE IN-

VENTION FROM FINLAND

"Ice concrete" is the name of a new, porous and light building material recently invented in Finland. tremely porous by mixing it with crushed ice and snow. Then the moisture is evaported through heating. By this process the block or brick is pores. No additional water in composition is needed, since the water required is formed through the melting A total of 1,500 red fox skins were of the ice or snow. The degree of quality of ice or snow used Consein direct relation to the number and The country, is well filled with fur size of the pores. It is possible to

buyers, Lettsfeldt said, and a number use as much as from 50 to 80 per cent! of ice or snow in the mixture, thus business today is all t producing millions of minute pores bare .- Arkansas Gazet throughout the material. In Finland. Sweden and Denmark numerous buildings have been erected, using ice concrete.

HEALTH SERVICE WARNS AGAINST RABBIT FEVER

WASHINGTON .- Warning to the public in general against a: serious and often fatal disease known as rabbit fever or deer fly fever has been issued by Paul G. Redington, chief of the Biological Survey, and approved by the public health hervice.

The disease has spread so widely that a public warning was considered. advisable. It is a plague like disease of rodents, transmissible to human beings, and of 500 human cases reported in this country 20 have terminated in death.

THE KUSKO TIMES BATURDAY, DECEMBER 1. 1928

L. D. HENDERSON TELLS OF TRIP ACROSS YUKON-KUSKOKWIM PORTAGE

(Alaska School Bulletin.)

The portage between the Yukon and Kuskokwim rivers may be Greek to some Alaskana, but it is an open book to those of us who have ridden, mushed, waded, pulled, and packed it. Fortaging is both an art and a science. To Charles Jacobsen, veteran mail carrier between Russian. Mission on ithe Yukon, and Bethel, near, the mouth of the Kuskokwim, it is all in the day's work, and at that lake where two open boats projelled circumstances. He also refers to the the day begins at 6 a. m. and lasts until the weel small hours of the following morning. Four such days are consumed on the trip, so it is no special handicap to a mail carrier if he sands 6 feet 2 inches in his water nukluks and weighs 220 pounds, as does Mr. Jacobsen.

The reader should not get the impressino that the traveler on the port. age observes such strenuous hours. He may tuck himself in beneath his nicsquito-proof bed net at 9 p. m. if. he so desires and be awakened by the odor of bacon and eggs at 6 a. m. Leantime Mr. Jacobson and his crew of Eskimo boys have been busily engaged in packing several tons of nal, baggeg., gasoline, food freight, and boats across a mile, of spongy tundra to the next lake or stieam in order to be ready for the early morning start. We have no idea what Uncle Sam pays for this mail contract, but we are positive. that any amount approching what it once cost to persuade Jack Dempsey to don the gloves is actually earned...

It is approximately 25 miles from the left bank of the Yukon to the right bank of the Kuskokwim as the crow flies, and 120 miles by the trave.ed portago route. The disparity in these figures will give some smalll idea of how the small streams which are, traversed wind and wind. We le't Russian Mission at-arm m. on August 7 in two boats, one open and propelled by a Johnson outboard motor, and the other a canvas covered launch. The party consisted of four men. one woman, and seven children, the youngest six weeks of age, in adallion to boat crews." Our cargo was made up of several hundred pounds of mail for Kuskokwim river, points, besides baggage and the necessary food and gasoline to keep passengers and engines going. The weather was clear and continued so throughout the journey, an exceptional occurrence. We rejoiced at this. It requires no great stretch of the imagina ation to picture th ediscomforts. of travel in open boats and on foot across such a region in a steady, downpour of rain.

The Tatlawicksack river flows into the Yukon opposite Russian Micsion. W.e. entered the stream and breasted. its sluggish current a distance of 40.

the remaining portages are flat and and himself in particular." carried across the portage t. o small Alaska. He gives names, dates and camped for the first night on the fact that the Governor's office in Juby outhoard motors awaited us. We neau contains the data of many other shore of this lake, the men of the cases _ * their own use. plenty of mosquitoes.

Wo began the second day by crosssmall streams. That is, all lakes but browns and grizzlies, has lake, is of particular interest. It is neau Empire. several miles wide and, as its name implies, presents to the view the appearance of a broad grassy plain. toons in place of shoes since the tall deep. A winding lane, kept free of grass by engine propoller blades, is followed across the lake, which finally terminates in Crooked creek, most aptly named. After winding down this creek a distance of 36 miles our boats entered Johnson river, of which Crooked creek is a tributary. We journeyed up this river for 15 miles to the third portage, a mile in width, arriving at nightfall of the second day. By the time mail, boats, and baggage had been dragged across the mile of tundra separating Johnson river from a small lake, our next waterway, we were ready for a night's repose in shelter cabin - and tent.

The third day opened with a boat ride of 100 yards across a small lake, followed by an overland journey of the same length to Mud creek, a tributary of the Kuskokwim river. Again boats and contentts had to be dragged and carried from the lake to the creek. Down this creek our trusty Johnson outboard motors propelled us adistance of 12 miles to the broad expanse of the Kuskokwim. It is easy going from this point to Bethel, 120 miles down river, and the end of the mail route.

Some time in the not distant future the residents of this section of Alaska hope to have the distance between Alaska's two great rivers shortened and the journey made easier through the construction of a few short Iditan

miles to what is termed the high I have hunted grizzlies and have portage. This portage is about one never been attacked. But I know a half mile across. Its name, the high man who had the whole top of his portage, is derived from the fact that scalp torn off by a grizzly while the ground between the river landing peacefully walking along a mountain and a small lake, the next waterway, trail. This man is firmly convinced rises about 100 feet above water level, that his bear nursed ar deep-seated thus necessitating a climb, whereas grouch against mankind in general marshy and a few feet only above . The Governor then proceeds with the level of lakes and streams which more than a dozen instances of untouch them. One or two boats were proveked attacks by grizzly and abandoned at the river landing, and brown bears that came under his obmail, baggage and personal freight servation while he was Governor of

party giving over the shelter cabin to, Governor Riggs used the aggresthe use of the woman passenger and siveness of both brown and grizzly her children and pitching a ten for bears to prove his case because the Yes, there were Biological Survey puts them in the same classification.

• O course, Governor Riggs is right. ing a chain of lakes connected by The case against the Alaskan bears. been two were thus connected. A mile of proven so often that it causes one to tundra, the second portage, connects wonder why the discussion now. And, these two, and boats, mail, baggage, probably more than any other one etc., weredragged across this portage man, Governor Riggs gathered the by man power. One lake, Grassy evidence to cinch the argument .-- Ju-
