ANNUAL REPORT

OF

U.S. ALASKA ROAD COMMISSION

FOR

YEAR ENDING JUNE 30, 1934

ALASKA
TE
24
A4
A2
1933/34

THE ALASKA ROAD COMMISSION

The Alaska Road Commission was created by act of Congress approved Jan. 7, 1905 as a bureau of the War Department. By act of Congress approved June 30, 1932 the activity was transferred to the Department of the Interior. Under orders issued by the Secretary of the Interior, administration of the activity was assigned to the Governor of Alaska in his capacity as ex-officio commissioner for Alaska, with a chief engineer in direct charge of the work under the direction of the Governor.

The Alaska Road Commission is charged with the construction and maintenance of roads, bridges and trails in Alaska. Construction and maintenance of airfields, telephone lines and shelter cabins is also undertaken for the Territory.

Funds are made available for the work by annual Congressional appropriations, from the "Alaska Fund", and from contributions by the Territory of Alaska and others. During the past year in addition to the above usual sources of funds, \$1,746,000 was allocated by the Public Works Administration under the National Industrial Recovery Act for new road and airfield projects.

The total costs to the end of the fiscal year are \$19,978,181.65, of which \$10,349,284.16 was for new work and \$9,628,897.49 was for maintenance and improvement.

The total expended to June 30, 1934 was \$20,440,743.04. Of this amount \$14,529,306.93 was appropriated by acts of Congress, \$4,083,432.87 was allotted from the Alaska fund, and \$1,823,003.24 from Territorial appropriations and contributions.

The work accomplished during the fiscal year may be summarized as follows:

New construction: 136 $\frac{1}{4}$ miles of road, 35 miles of trail, 820 linear feet of bridges over 60-foot span, 4,703 linear feet of trestle span bridge and 3 airplane landing fields.

Improvement: 35 miles of road reconstructed, 70.83 miles of road surfaced, 450 metal culverts replaced and 11 airfields enlarged and improved.

Maintenance: 1,543 miles of road, 74 miles of tramway, 573 miles of sled road, 4,759 miles of permanent trail and 273 miles of temporary flagged trail.

The cost during the year was \$1,269,497.76, of which \$305,643.11 was for new work and \$463,854.66 was for maintenance and improvement. Total expenditures during the fiscal year were \$1,432,881.48.

The more important roads upon which new construction was performed were the McCarthy-Nizina, Mount McKinley National Park, Gulkana-Nabesna, Olnes-Livengood, Dillingham-Snag Point, Nome-Sunset Creek, Iliamna, Lucky Shot Mine-Willow Station, Anchorage-Matanuska, Kodiak-Mill Bay, Cantwell-Valdez Creek, Medfra-Nixon Mine, Flat-Slate Creek, and Seward Peninsula Tramroad extension. New airfields were constructed at Cordova, Nome and Bremner.

The Richardson Highway was maintained open during the entire season. Improvement to new standard was continued and this road is now in excellent condition for auto traffic.

Surfacing the Steese Highway was continued. As a result of the improvement traffic over this route continued to increase. Work was continued on the major project of constructing a road from Gulkana, on the Richardson Highway, to Nabesna, through the mineralized belt north of the Wrangell Mountains. The work was started early in 1933 and, except for destructive floods in a few localities, weather conditions were favorable and the work progressed satisfactorily.

The work of maintenance and rehabilitation has been pushed, and the roads and trails under the jurisdiction of the commission are in better shape than ever before. The total mileage of roads and trails constructed and maintained by the commission since its inception aggregate 11,484 $\frac{3}{4}$ miles, consisting of 1,798 miles of wagon road, 74 miles of tramway, 1,576 $\frac{1}{2}$ miles of sled road, 7,324 $\frac{1}{4}$ miles of permanent trail, and 712 miles of temporary flagged trail.

The road and trails constructed by the commission have not only opened up to development nearly all sections of the Territory but have effected large savings in freight charges. The major portion of this freight would not have been transported without the roads, and the indirect loss which would have been occasioned by the restriction on output and development, if the roads did not exist, can not be estimated.

Under a cooperative agreement with the National Park Service, the Alaska Road Commission has undertaken the construction and maintenance of roads and trails in Mt. McKinley National Park and the maintenance of Sitka National Monument with funds allotted by the Park Service. At the close of the fiscal year 66 miles of road were suitable for traffic and 21 miles were under construction in Mr. McKinley Park. The route selected is one of great scenic grandeur. The Sitka National Monument has been placed in excellent condition and maintained.

FUNDS

Money for the prosecution of this work was provided from six sources as follows:

(1) Appropriation by the Federal Government to the Department of the Interior for expenditure in conformity with act of Congress approved January 27, 1905, and amendments thereto.

(2) From a portion of the Alaska Fund, a fund covered into the Federal Treasury but derived entirely from special taxes imposed by the Federal Government upon various industries in the Territory.

(3) Funds appropriated by the Territorial Legislature and turned over to the Treasurer of the United States for expenditure on construction, repair and maintenance of roads, bridges, ferries, trails and related works in the Territory as provided by act of Congress approved June 30, 1921. These funds are expended upon projects designated by the Territorial Board of Road Commissioners.

(4) Money allotted by the National Park Service and expended under its direction entirely within the boundaries of national parks and monuments.

(5) Contributions by individuals, companies, corporations, et cetera.

(6) Funds allotted by the Public Works Administration as provided in the National Industrial Recovery Act.

Any balances remaining over at the end of a fiscal year from regular sources of revenue, Items 2 to 5 inclusive, are available for the succeeding fiscal year. Unused balances from the Public Works allotment are available until July 1, 1935.

Under the act approved March 2, 1934, \$452,000 was appropriated as Item 1 for the current year, or fiscal year 1935. Under the Public Works Administration a total of \$1,746,000 has been allocated including \$150,000 to be expended under the direction of the National Park Service.

SUMMARY OF ALL EXPENDITURES TO JUNE 30, 1934.

The Commission has expended the following funds since the beginning of road and trail development in the Territory:

Fiscal year	Congressional appropriations	Alaska fund	Other funds	Total	Fiscal y
1905	\$ -----	\$28,000.00	\$-----	\$28,000.00	1918
1906	118,172.09	57,420.77	-----	175,592.86	1920
1907	197,930.91	148,814.79	-----	346,745.70	1921

TERRITORIAL FUNDS

The Territorial legislature biennially appropriates funds for the construction and maintenance of roads and trails. These funds are allocated to projects by the Territorial Road Board and are expended under the direction of the Alaska Road Commission.

104,175.8

\$4,088,432.8

For the working season of 1934 (fiscal year 1935) the Territorial Board has allotted to the Alaska Road Commission the following amounts:

Cooperative road projects.....	\$34,300
Shelter cabins.....	1,000
Aviation fields.....	<u>5,700</u>
Total.....	\$41,000

MATERIALS, SUPPLIES AND EQUIPMENT

Alaska products are preferably used in the work when the price and quality compare favorably with the cost of the same items landed at warehouses in Alaska.

All supplies not procured in Alaska are purchased for the Commission by a governmental purchasing agency in Seattle, acting also for various other bureaus operating in the Territory. The cost of this service is shared by the individual bureaus on a pro rata basis. The share for the Alaska Road Commission is 4 percent of the invoice price of items thus purchased.

Work is performed by mechanical equipment to every extent deemed advantageous. Small jobs in remote sections are necessarily done by hand. The Commission is now fully equipped to handle construction and maintenance work within the present limits of appropriations except for replacement of unserviceable or obsolete equipment. During the fiscal year just closed the following pieces of mechanical equipment were purchased:

ORGANIZATION

Labor, both common and skilled, is secured entirely from local residents. Labor has been plentiful the past year. It is encouraging to note the exceptional loyalty to the organization which is manifested generally even by the lowest paid laborers. This may be attributed in part to the fact that, though the work is only seasonal, many of these men have worked for the Commission continuously for 5 to 10 seasons and in part to the fact that as a whole Alaska labor is probably superior to that found elsewhere.

At the Juneau headquarters, located in the Federal and Territorial Building, is the general office staff consisting of a chief engineer and an assistant chief engineer with necessary clerical assistants. Disbursing is performed by the disbursing officer for the Department of the Interior at Juneau.

Five district offices and two district suboffices are located at strategic points in the field. The suboffices are closed during the winter months. Due to increased air travel, which caused a marked decrease in the use of winter trails, the Kuskokwim district office was discontinued during the winter of 1932. The summer season's operations in this district are now handled by the Southwest district office. The work in the vicinity of Bethel, where no office is maintained and which was formerly a part of the Kuskokwim District, is handled direct from the Juneau office. The work near or adjacent to Juneau, and known as the "Southeastern District", is supervised from the headquarters office.

The organization, with its widespread activities throughout the Territory, is equipped to handle many phases of construction work, and in many instances has lent itself to the supervision of construction work of various kinds for other branches of the Federal Government, and for the Territorial Government. This consolidation of work has doubtless saved considerable public expenditure, particularly on small projects in isolated sections. Especially is this true of small road projects undertaken by the Territorial Government and which were not included in the general road program of the Commission.

CONSTRUCTION METHODS

Although standard construction and maintenance methods are employed in Alaska so far as practicable, it is necessary to vary therefrom in some instances because of special physical and climatic conditions.

The frozen condition of the subsoil and the constant thawing during summer require special precautions for drainage. Intercepting ditches on the up-hill side of the road are frequently necessary and after the

vegetation has to thaw, settling the grading are required to maintain traffic due to thawing cover and block

awing during
g ditches
after the

vegetation has been stripped from the roadway the ground must be allowed to thaw, settle, and consolidate for several months before completing the grading and applying the surfacing. Frequently one or more seasons are required for such drainage and consolidation and in order to maintain traffic during this period corduroy must be used. Sloughing banks, due to thawing of the subsurface ice, frequently cause slides which cover and block the roads.

Special methods of revetment and stream control must be used to withstand the destructive effects of sudden and frequent freshets and washouts that result from heavy rains in the mountains or the release of impounded waters by breaks in glaciers. The most suitable type of revetment for this purpose is built of brush weighted down with stone in bundles wrapped in wire mesh to prevent its washing away.

Gravel for road surfacing is generally available within reasonable hauling distance. Graveling is necessary for practically all roads which are used by automobiles. Concrete or other forms of hard-surfaced roads are nowhere warranted in the present stage of development of the Territory.

Bridges are built of native or imported timber or steel, depending on their importance. Fir has been found to be the most suitable material for timber bridges but improvements in methods of local timber production now in progress will, if successful, make possible some use of Alaska hemlock for structural purposes. Metal culverts are being introduced to replace the culverts or native timber heretofore used.

OPERATIONS DURING THE FISCAL YEAR

The work in the past fiscal year was greatly increased as a result of the allocation of a substantial amount of emergency funds by the Public Works Administration. These funds were available for new construction and reconstruction on much needed projects. These included thirty-three road projects, sixteen airfields, one dyke project and one important bridge project, a bridge over Gastineau Channel connecting Juneau and Douglas. Work on these projects was 57 percent complete at the end of the fiscal year. Ordinary funds were sufficient only for maintenance of the existing system. Emergency funds were also made available by the Civil Works Administration and civil works projects under the Governor of Alaska, who was appointed Administrator of Civil Works for the Territory, were directly supervised by the Alaska Road Commission under direction of the Governor. Due to the greatly increased activity as a result of these emergency funds the organization has experienced an unusually active year.

The Richardson Highway was open from Valdez to Fairbanks from June 8 to October 4.

The surfacing program for the Steese Highway was continued and at the end of the season only 6 miles of the total of 162 miles remained unsurfaced.

The Gulkana-Nabesna road, leading from the Richardson Highway to the Nabesna mining region, was completed as an earth road permitting the use of automobile trucks to the mine after the freezeup. Its total length is 107 miles, 43 miles of which were converted from a tractor road a dry-weather automobile road during the season.

The highway through Mt. McKinley National Park was opened for an additional distance of 1.25 miles, the constructed portion of the route now totaling 67.50 miles in length and leaving 21 miles to be completed. When completed the route will extend to the north park boundary, only 5 $\frac{1}{2}$ miles from the Kantishna mining district, a district reported to contain quantities of very valuable ores. Work on this road was confined to maintenance until late in the summer when Public Works Administration funds were made available.

Upon receipt of P. W. A. funds the middle of August work was pushed on the Olnes-Livengood project resulting in extending this route as a dry-weather automobile road to Mile 17. Much preliminary work in the way of clearing and freighting supplies for the 1934 season was done during the winter.

With a special allotment under the Public Works Administration, the organization took over the Anchorage-Eklutna road which had been started and partially graded by the town of Anchorage. During the remaining summer season and the past winter the road was graded for 12 miles, bridges were constructed over Eagle River and Peters Creek. A 300-ft. steel bridge with 120 feet of approach was put in over the Matanuska River at Palmer on the proposed extension of this road.

The Lucky Shot-Willow Station sled road was converted to an automobile road for dry weather use as was the road connecting Iliamna Bay and Iliamna Village.

Contracts were let for the construction of the Juneau-Douglas bridge, the foundation work starting on April 23, 1934.

New aviation fields were constructed at Nome and Cordova from Public Works Administration funds.

Several new short roads and extensions were built in farming and mining areas.

At the request of the Commanding Officer, Chilkoot Barracks, the Alaska Road Commission undertook the supervision of the rehabilitation

of the Sitka National Cemetery. Funds for the work were provided by the Public Works Administration through the War Department. Expenditures were \$4,583.41.

Work accomplished during the fiscal year is summarized as follows:

New construction: 136¼ miles road, 35 miles trail, 820 linear feet of bridges of 60-foot span or over, 4,703 linear feet of trestle span, 61 linear feet of concrete bridges, and 3 airfields.

Improvement: 35 miles road reconstructed, 70.83 miles road surfaced with 106,844 cubic yards gravel, 450 metal culverts installed and 11 airfields enlarged and improved.

Maintenance: 1,543 miles road, 74 miles tramway, 573 miles sled road, 4,759 miles permanent trail and 273 miles of temporary flagged trail were maintained at their usual standard.

The total mileage of all routes as of June 30, 1934, is as follows:

	Road	Sled Road	Trail	Flagged Trail	Grand Total
June 30, 1933.....	(a) 1,735¾	1,617	7,284¾	712	11,349½

No work of either maintenance or improvement during fiscal year 1934.....	118¾	1,003½	2,530¼	439	4,091½

(a) Includes 74 miles tram road.

PROPOSED OPERATIONS

In addition to \$452,000 from appropriated funds, it is estimated there will be available from the "Alaska Fund" and Territorial appropriations \$130,000 for the fiscal year ending June 30, 1935.

These funds will be required for normal maintenance of the existing system and for a limited improvement of certain sections. Surfacing will be provided where possible with available funds and a limited mileage of tractor road will be improved to an extent permitting the use of truck traffic in dry weather only.

In addition to the above funds there is an unexpended balance of \$912,124.22 from Public Works Administration allotments. These funds will be expended during the fiscal year on the projects to which they were allocated.

RECOMMENDATIONS

For the fiscal year ending June 30, 1936 an appropriation of \$1,100,000 is recommended in addition to funds available from other sources. This will provide for necessary maintenance to the existing system and for the continuance of a reasonable program of construction on projects now under way and on needed new projects.

The principal projects on which new work would be performed are as follows:

Olnes-Livengood. This project should be surfaced throughout making it passable in any kind of summer weather.

Bunker Hill-Kougarok. Extension of road to serve mining area.

Kantishna-Park Boundary. Extension of Park road beyond boundary to serve mining area.

Anchorage-Matanuska. Completion of this project from El-lutna to connect with the Matanuska River Bridge at Palmer.

Hot Springs-Tofty. Improvement of a winter sled road truck road standard.

Chistochina-Slate Creek. Improvement of a winter sled road to summer tractor road standard.

Colorado Creek. Construction of a tractor road to serve mining development.

Teller-Bluestone. Extension of road to serve mining activities.

Cantwell-Valdez Creek. Improvement of trail to summer tractor road.

Newhalen-Lake Clark. New road construction.

Homer-Kachemak Bay. Extension of road to serve farming area.

Skagway-Glacier. Completion of road already started.

In addition to the above listed projects work will be required on a number of small projects to serve developments as they occur.

With the period covered by this report the Alaska Road Commission concludes its thirtieth year of service. The work accomplished consists of the construction and maintenance of 1,872 miles of wagon and tram road, most of which is suitable for automobiles, 1,576½ miles of winter sled road, 7,324 miles of trail and 712 miles of flagged trail. The total costs to the end of the fiscal year are \$19,978,181.65, of which \$10,349,284.16 was for new work and \$9,628,897.49 was for maintenance and improvement. The total expenditures to date are \$20,440,743.04 of which \$14,529,306.93 was derived from Federal appropriation acts. The balance, \$5,911,426.11, or 29 percent of the total expenditures, was obtained from Alaskan sources.

The pioneer period of the Alaska Road Commission is largely over. All existing mileage has been opened and improved, so far as funds have permitted. The present system of roads serves as the basis for future development of overland routes throughout the Territory. This development calls only for additional funds for construction.

COSTS

A standard cost system is maintained in all districts, from which, over a period of years, valuable information can be secured in the preparation of estimates. In the use of such data, however, consideration must be given to the large differences in freight rates, labor costs and climatic conditions in the various sections.

In the interior of Alaska the average cost for construction of a mile of gravel-surfaced road capable of continuous traffic in any kind of summer weather, and of such width as to enable cars to pass at any point, is \$9,000.

Annual maintenance costs, including minor improvements, are roughly considered as \$300 per mile for wagon roads, \$25 for sled roads, \$10 for trails and \$3 for flagged trails. For the working season of 1933 the cost of maintenance, including minor improvements, was \$246 per mile for roads, \$17 for sled roads and \$6 for trails. Roads were kept open for traffic, except in unusual circumstances but in certain instances maintenance was insufficient due to lack of funds.

Very little engineering is done on roads after the final survey is made. A resident engineering force is never maintained. To take the place of a permanent engineering force on a new job, foremen of long experience are employed and advised frequently by superintendents who are either engineers or men of wide experience on engineering work of this nature in Alaska.

Dispensing with relatively large engineering forces has reduced costs materially and, due to the low type of construction undertaken, has not adversely affected the work to any extent.

The Richardson Highway, which with the Edgerton Cutoff from Chitina totals 410 miles, is now in such condition that a 2-ton truck can ordinarily travel from Valdez to Fairbanks, 370 miles, in 18 hours. Actually the first automobile went over this route in 1913 but due to lack of funds improvement to a fair standard proceeded slowly. The average cost per mile to June 30, 1934 including all costs for construction and maintenance over the entire period of use for the 410 miles, is \$17,379.99.

The Steese Highway extending from Fairbanks to Circle, a distance of 162 miles, is suitable for traffic not exceeding 2-ton trucks. Including maintenance of completed sections over a period of 16 years, the total cost per mile of this road to June 30, 1934 is \$11,118.42.

A consolidated cost statement of all routes follows:
