*Report's Filed  
Contract Bond 9/27/51*

AFG:

Talked to Mort Flint about  
progress (Stoddart out of town)  
and he said that they are pushing  
Contractors to step up production.  
Also stressed to him that this is  
one contract on which there should  
be no relaxation on completion  
date or liquidated damages. He  
agreed. 9/12/51 WGN

Mr. A. F. Ghiglione  
Commissioner of Roads for  
Alaska  
Alaska Road Commission  
Juneau, Alaska

Dear Mr. Ghiglione:

Attached is Form P.R. 33-A, Construction Inspection Report  
No. 4 for Sections A2, B3 of the Seward-Anchorage Highway.

This report indicates that progress is unsatisfactory  
as the percent of time elapsed is considerably greater than the  
percent of work completed. We have written to the contractor  
pointing out the deficiency in progress and calling attention  
to the necessity for taking required steps to insure completion  
on time. An improvement in progress is anticipated.

Yours very truly,

*Hugh A. Stoddart*

# PUBLIC ROADS ADMINISTRATION

Division No. 10 County 4th Jud. Div. State Alaska  
Construction Inspection Report No. 4 Project No. Alaska A. B-1  
Project location Alaska Highway, Big Delta Junction south to Berry Creek  
Type and length of improvement Grading and Surfacing, 4241, 51.75 miles

Inspection made by A. K. Heasley, Highway Engineer Date of inspection August 28, 1951  
In company with J. H. Hortensine, Resident Engineer, and E. B. Cornell, Ass't.  
Res. Engr.

16-15641-1

## 1. STATUS OF PROJECT:

- (a) Quality of work Satisfactory (e) Percentage of time elapsed 24  
(b) Is progress satisfactory? Yes (f) Percent completed on date of inspection 6  
(c) Have materials used been tested and found satisfactory? Yes  
(d) Have unsatisfactory features noted previously been corrected? None noted (g) Estimated percentage of completion at end of month 6

## 2. WORK DONE TO DATE:      3. WORK IN PROGRESS:      4. COMMENTS AND RECOMMENDATIONS:

(Report by paragraphs (2), (3), and (4), using space as required.)

### 2. WORK DONE TO DATE:

#### Clearing and Grubbing:

Sta. 351 to Sta. 586 - 95%. This is the only area where roadway clearing and grubbing is a separate pay item.

Borrow pits at Stations 80, 92, 176, 205, 262, 382, 443, 488, 594, 656, 697, 835 and Stations 362 and 366 on the relocation have been cleared.

#### Grading:

Necessary stripping on pits noted above has been completed.

#### Roadway excavation (Relocation only)

Sta. 351 to Sta. 401 - Fills are complete except for select. Cuts are mostly out but not finished.

Sta. 401 to Sta. 415 - Cuts are 90% out.

Sta. 415 to Sta. 420 - 70%. Cut is wet but material on Lt. is dry and fairly sandy. Contractor has borrowed approx. 5000 c.y. here to make fill ahead.

Sta. 427 to Sta. 429 - 90%

Sta. 429 to Sta. 440 - 60%. Frozen area.

Sta. 440 to Sta. 475 - 1%. Stripping only.

Sta. 475 to Sta. 480 - 5%. Stripping has been moved hydraulically.

Sta. 488 to Sta. 501 - 25%

Sta. 501 to Sta. 515 - 1%. Stripped and some fill made.

Sta. 515 to Sta. 521 - 30%

Sta. 521 to Sta. 536 - 1%

Sta. 536 to Sta. 539 - 80%

Only minor activity on pipes to date.

### 3. WORK IN PROGRESS:

Two D-8 dozers were idle at the contractor's shop Sta. 357.

A 10' pull grader was idle at Sta. 400.

An HD-19 tractor and carryall scraper combination was excavating in the cut at Sta. 406 and hauling to Sta. 403.

A #12 patrol grader was working at Sta. 410.

A carryall scraper was idle at Sta. 420.

A D-8 and a D-6 dozer were stripping left of Sta. 428.

A 3/4 yd. Koehring shovel was loading two DW-10 scraper units in the cut at Sta. 497 (frozen material). This wet muck was being deposited on the sides of a fill at Sta. 510. A D-7 dozer was on the dump. A 105 c.f.m. compressor was in use drilling the frozen cut for shooting.

A D-8 dozer was working in the channel of Johnson River diverting water from the proposed borrow pit.

Two D-8 dozers which had been clearing and stripping borrow pit sites were moved to Sta. 950 to clear off a camp site.

### 4. COMMENTS AND RECOMMENDATIONS:

The contractor now has more equipment on the project than at any previous time and is bringing in more each day.

The hydraulic operation mentioned in this report and also in report #3 was small scale. Two pumps were used, a 2" for jetting and a 3" for "ground sluicing". Water was pumped from the Tanana River approximately 200' away. The contractor had piled some strippings in the center of the clearing while the ground was frozen and was unable to get near it later to haul it away. The hydraulic method was used only to remove this material. A large scale operation was considered for removing the frozen cuts in this vicinity. According to experts on hydraulic work it is now too late in the season as the melting action of the sun is a necessary factor.

Good progress has been made on pit clearing and stripping.

A small shovel is enroute to speed up placement of culverts.

The contractor is now using a 3/4 c.y. shovel in one of the frozen cuts. This unit cannot dig the frost and it is necessary to shoot immediately ahead of excavation as the shot material freezes solid again if left over night. It appears that heavier equipment, that can remove the frozen cuts with a minimum of shooting, will be required to complete this phase of the grading operation during this construction season.

3. WORK IN PROGRESS:

3 men were using a derrick truck to install a 24" culvert at Sta. 63.  
 The 1 1/2 yd. dragline was piling up borrow material in the pit left of Sta. 75/00. Three tournapulls were hauling from piles to station 73/00, assisted by 2 push cats and a dozer on the dump.  
 One tournapull, a carryall scraper, a dump truck and a service truck were all idle at the contractors shop. (Sta. 73/00)

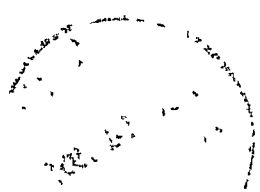

4. COMMENTS AND RECOMMENDATIONS:

The material from the borrow pit left of station 75+00 is of excellent quality. Very little of the expected debris has developed in the pit to date. The turnpulls are able to haul full loads and the resulting subgrade will be well compacted in shallow layers.

Progress shown to date indicates that considerable additional hauling equipment will be required to complete the grading by Dec. 15 as specified. The contractor has this equipment available at Anchorage and plans to bring it to the project as soon as it can be worked economically.

Items connected with the bridges have been subcontracted to the Munter Construction Company, Inc. Cement for the bridges has been shipped and some arrangements for piling have been made. Apparently the subcontractor plans to accomplish as much work as possible on the piers and abutments this fall.

The contractor plans to place a shallow lift of borrow (1' to 2') over the entire length of the project as soon as possible. This well compacted haul road will assure ready access to all parts of the job after wet weather sets in this fall.

SUPPLEMENT TO FIRST CONSTRUCTION INSPECTION REPORT

State Alaska

Project No. Seward-Anchorage A-3

5. PROJECT LOCATION, INCLUDING STATIONING:

Seward City Limit Sta. 28/74.8 to 107/88.4 Mile 3

6. LIST OF PROPOSED EXPERIMENTAL FEATURES, IF ANY:

None

7. ROADWAY:

Inspection made by A. K. Neeley, Highway Engineer Date of inspection July 31, 1951  
In company with J. E. Hortensino, Resident Engineer

16-15641-1 GPO

1. STATUS OF PROJECT:

- (a) Quality of work Satisfactory
- (b) Is progress satisfactory? No
- (c) Have materials used been tested and found satisfactory? Yes
- (d) Have unsatisfactory features noted previously been corrected? None noted
- (e) Percentage of time elapsed 19%
- (f) Percent completed on date of inspection 4%
- (g) Estimated percentage of completion at end of month 4%

2. WORK DONE TO DATE:      3. WORK IN PROGRESS:      4. COMMENTS AND RECOMMENDATIONS:

(Report by paragraphs (2), (3), and (4), using space as required.)

2. Work Done To Date:

Clearing and Grubbing:

Sta. 351 to Sta. 586 - 95%. This is the only area where clearing and grubbing is a pay item.  
Borrow pits at Sta. 361 and Sta. 366 have been cleared.

Grading:

Sta. 351 to Sta. 370 - 90%  
 Sta. 370 to Sta. 390 - 0  
 Sta. 390 to Sta. 412 - 40%  
 Sta. 427 to Sta. 429 - 90%  
 Sta. 429 to Sta. 440 - 60%. Frozen area  
 Sta. 440 to Sta. 455 - 1%. Stripping only  
 Sta. 475 to Sta. 480 - 5%. Thawed strippings have been pushed to ravine at Sta. 480.  
 Sta. 485 to Sta. 501 - 25%. Has been stripped and some borrow brought in.

Borrow is 4% complete from Sta. 361 and Sta. 366.

Drainage Structures:

A small crew has been working on the wood stave pipe extensions and on the extensions of box culverts. Four laminated boxes extended to date. Nine wood stave pipes extended and five new metal pipes installed. (Culverts are 7% complete) Very few of necessary pipes are on job.

3. WORK IN PROGRESS:

Two men setting guard stakes at slope stakes Sta. 521.  
 Three men setting up pumps at Sta. 480 getting set to try a hydraulic operation. (See comments)  
 A D-7 dozer was hooked to a 12' pull blade at Sta. 418 preparatory to shaping cut slopes Sta. 418 to 420.  
 A D-8 and carryall scraper excavating Sta. 400 to 410.  
 A carryall scraper was idle at Sta. 361.

4. COMMENTS AND RECOMMENDATIONS:

On July 29 Mr. G. B. Martin, who had three tractors rented to the contractor, pulled all his equipment off the job. This leaves the job a good deal worse off than it has been before. No definite arrangements have been made to date for additional equipment.  
 No appreciable effort has been expended on the frozen cuts Sta. 435 to Sta. 500 since the last inspection. Frost has receded an average of 1' to 2' over the entire area and the thawed material is so wet that it is almost impossible to operate cat equipment through it. There is no doubt that a good deal of this material will have to be wasted as it contains too much vegetable matter. Apparently a dragline would be the best piece of equipment to use at this time but the contractor does not have one available. As a temporary expedient, pumps have been installed on the Tanana River near Sta. 480 and an attempt will be made to dispose of the waste by hydraulic means.  
 Since a greater portion of the 1951 construction season has passed without appreciable progress being made, it appears unlikely that the grading specified will be completed satisfactorily during the remainder of this construction season. Progress is therefore reported as unsatisfactory. Following is a tabulation of tests taken in some of the frozen cuts:

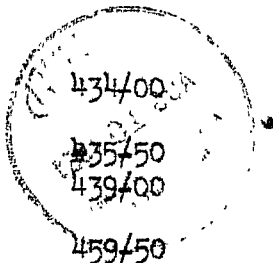

Samples from 2" layer next to permafrost

<u>Station</u>	<u>Date of Sample</u>	<u>Moisture</u>	<u>Pass 200 M (wash)</u>
476/00	7/14/51	122%	72%
480/00	7/16/51	57½%	86% Dried - Brown color
481/25	7/14/51	94½%	82%

Sample from top of layer on permafrost

497/75	7/13/51	54½%	81% Dried - Brown
438/00	7/9/51 (J.R.H.)	24½%	41½%
443/00	6/9/51	97.9%	84%

Where taken

434/00	6/9/51	5.6%	Dry sandy silt from bottom of cut.
435/50	6/9/51	51.4%	To fill 2'
439/00	6/9/51	38.6%	1' below top of 15' cut.
459/50	6/9/51	35.7	1' below top of 6' cut.

Borrow:

Sta. 249/50 to Sta. 271 - 90% 20% of total project  
Sta. 435 to Sta. 455 - 75%  
Only two pipes have been installed to date.

3. WORK IN PROGRESS;

The contractor is starting a camp at Donnelly Dome. Two buildings have been brought in and two men were working around camp.

A D-8 cat and carryall scraper were working in the borrow pit left of Station 424 assisted by a D-8 push cat. The material was going into a fill at Sta. 418.

A D-8 dozer was drifting material from the cut at Sta. 235.  
Three cats were down for repairs.

4. COMMENTS AND RECOMMENDATIONS:

Progress is shown as unsatisfactory because of slow progress and lack of equipment on the job. It appears unlikely that the percent complete can be brought up to the percent of time elapsed before freezing weather sets in.

The contractor plans to have a dragline in operation on the project by August 10.

No particular difficulty has been experienced to date in the frozen cuts. The material in these cuts is a sandy loam and dries rapidly in the wind. The contractor keeps it moved out as it thaws and does not allow it to pile up.

During a recent storm water from Darling Creek washed out a portion of the fill which had been placed. The contractor had been warned not to start the fill until Darling Creek could be diverted. He will have to assume the loss.

Investigation is being carried out on a possible source of borrow at Station 910 about 1500' right. If this source proves out it appears that considerable saving in haul will result.

Piling for all four bridges on this project (Separate contract by Alaska Road Commission) have been driven by M. P. Munter Construction Co.

- 2. WORK DONE TO DATE:
- 3. WORK IN PROGRESS:
- 4. COMMENTS AND RECOMMENDATIONS:

(Report by paragraphs (2), (3), and (4), using space as required.)

2. WORK DONE TO DATE:

The bridges at Peterson Creek (Sta. 989), Kern Creek (Sta. 1107), Glacier Creek (Sta. 1296) and Indian Creek (Sta. 1993) are complete except for minor touching up and cleanup. Only a small amount of painting and cleanup remains at Bird Creek (Sta. 1917).

3. WORK IN PROGRESS:

The painters were out of paint for the first field coat and no painting or other work was in progress.

4. COMMENTS AND RECOMMENDATIONS:

J. J. Badraun, the contractor on the job, has numerous other contracts in Alaska and neither he nor any of his representatives have been on the work since about June 15. A local contractor is doing the painting but has no authority to do cleanup work.

2. WORK DONE TO DATE: (Cont.)

Grading: (Cont.)

Select borrow from the pit right of Sta. 263 has been hauled Sta. 210-310 and is approximately 85% through this area.

Minor drainage structures are 25%.

The piers and abutments were putred on the Salmon Creek Bridge July 25.

Piles have been driven and capped and precast concrete stringers are in place at Bear Creek.

At the Grouse Creek Bridge at Sta. 354 the piles have been driven and caps are on.

3. WORK IN PROGRESS:

Four men were preparing for placing of steel at the Salmon Creek Bridge.

A D-8 dozer and three men were clearing in the borrow pit right of Sta. 263. In this same pit a 1 3/4 yd. dragline was loading five 8 c.y. trucks which were hauling select to Sta. 310. An Adams patrol grader was shaping the select material.

At Sta. 340 some fine grading was in progress. A Cat #12 patrol grader was in use.

A 2 1/2 c.y. shovel was loading excavation from the channel change at Sta. 409. Two Tournarockers were hauling back to Sta. 390 where a D-8 dozer was leveling the material on the dump.

A D-8 dozer was opening a cut at Sta. 448.

Compressors and wagon drills were idle at Stations 450 and 462.

A compressor was operating two wagon drills at Sta. 470.

A D-8 dozer was cleaning up after a shot at Sta. 479. Six men were loading holes in this vicinity.

A Cat and carryall scraper was idle at Sta. 490.

A Cat and carryall scraper was working at Sta. 500.

A compressor and wagon drill was operating at Sta. 502 and another unit was idle at 509.

4. COMMENTS AND RECOMMENDATIONS:

Frequent tests taken on the select borrow indicate excellent quality material from the pit right of Sta. 263.

Occasional pockets of mud and muskeg have been encountered in roadway excavation, and since time limitations are not sufficient for drying, most of this material has been wasted.

The planned length of piling at Grouse Creek did not give sufficient bearing and it was necessary to increase the length of all piles in this structure.

Concrete aggregates of good quality is being produced at Mile 18 by a local concern.

During the inspection we met Mr. Axel Osberg. He informed us that steps were being taken to get idle equipment working and to increase the night shift operation.

The increased activity indicated since the last report is evidence that the contractor is taking advantage of the excellent weather prevailing.

3. WORK IN PROGRESS:

- 1 Carryall scraper idle Sta. 204/00, D-8 tractor in camp for repairs.
- Sta. 403/00 2 D-8 Cat tractors w/scrappers, 1 Push cat, 1 D-8 w/dozer, foreman, dumpman and mechanic working.
- 1 #12 Cat patrol maintaining old road Sta. 395 to 430.
- 1 D-8 Cat w/dozer broke down in camp.
- Sta. 435/00 on Wye connecting road, 2 1/2 yd. Bucyrus Erie 54B shovel, 3 Euclid trucks, 1 foreman, 1 dumpman, 2 laborers working.

3. WORK IN PROGRESS: (Con't)

Sta. 465<sup>+</sup>, Stripping unstable material, 2 D-8 Cats w/scrapers, 1 D-8 w/dozer, 1 Push cat, 1 Foreman, 1 Dumpman 1 Laborer.

1 #12 Patrol maintaining old road Sta. 465 to 1075.

Sta. 497<sup>+</sup>, Drilling and springing holes, 2 500 cfm compressors, 2 wagon drills, 1 jackhammer, 1 flat bed truck, 1 foreman, 7 operators, working.

Sta. 725/62, Quartz Creek, 1 man rub finishing wing walls

Sta. 746/33, Summit Creek, 1 foreman, 3 carpenters, 1 laborer, 1 dump truck; Building forms for walls of barrel and wings, placing and tying reinforcing steel.

Sta. 926/06 Colorado Creek, 2 foremen, 2 carpenters, 4 laborers, 1 dump truck, 1 pickup, building forms and excavating for cutoff walls, placing and tying reinforcing steel in footing and base.

Sta. 1045 to 1050, 1 foreman, 6 laborers, 1 D-8 w/dozer, 1 flatbed, clearing and burning.

An average of 80 men are working on project.

4. COMMENTS AND RECOMMENDATIONS:

Clearing and grubbing will be substantially complete on L line next week with only borrow pits, scattered burning and cleanup remaining to be done.

Contractor plans to move grading equipment, now working at Sta. 403, when this section is tied into Kenai River Highway Junction at Sta. 412, to section adjoining Summit Lake Sta. 840 to 920. It is thought that this tight section adjoining Summit Lake would be much harder to build after the Seward-Anchorage Highway is opened to through traffic.

Contractor expects to pour concrete at Colorado Creek Friday of this week and at Summit Creek early next week.

At least 50% of the excavation Sta. 459 to 466 will have to be wasted as this material is very wet mucky material unsuitable for embankment fill. Equipment stripping this material is continually getting stuck.

The new grade is being used by traffic from Sta. 170 - beginning of project - to Sta. 298. Detours are in use at concrete box culverts Stas. 725/62, 746/33 and 926/06.

No borrow has been hauled to date.

Good progress was made this month with favorable weather conditions prevailing all month.

PUBLIC ROADS ADMINISTRATION

Division No. 10 County 4th Judicial Div. State Alaska  
Construction Inspection Report No. 2 Project No. Alaska Hwy. Sec. A, B1  
Project location Big Delta Junction South on Alaska Hwy. to Berry Creek  
Type and length of improvement 4241 51.75 miles

Inspection made by A. K. Neeley, Highway Engineer Date of inspection June 26, 1951  
In company with J. R. Hortenstine, Resident Engineer

16-15841-1 GPO

1. STATUS OF PROJECT:

- (a) Quality of work Satisfactory
- (b) Is progress satisfactory? Yes
- (c) Have materials used been tested and found satisfactory? Yes
- (d) Have unsatisfactory features noted previously been corrected? None noted
- (e) Percentage of time elapsed 12%
- (f) Percent completed on date of inspection 3%
- (g) Estimated percentage of completion at end of month 3%

2. WORK DONE TO DATE:      3. WORK IN PROGRESS:      4. COMMENTS AND RECOMMENDATIONS:

(Report by paragraphs (2), (3), and (4), using space as required.)

2. WORK DONE TO DATE:

Clearing:

Sta. 352 - 586 95% complete.

Grubbing:

Sta. 352 - 586 95% complete.

Uncl. Excavation:

Sta. 366 - 374 1% Stripped only.

Sta. 425 - 455 30% Has all been stripped, partly excavated.

Sta. 455 - 513 1% Stripped only.

Borrow:

10,000 Cu.Yds. removed from pit rt. Sta. 366

The pit rt. of Sta. 362 is cleared and stripped.

Drainage Structures are 3% complete.

3. WORK IN PROGRESS:

1 D-8 dozer was stripping the pit right of Sta. 362. This material was being pushed to the fill Sta. 362-366.

2 15 c.y. carryall scrapers, pulled by a HD-19 and a HD-20 tractor were hauling borrow from the pit rt. of Sta. 366. This material was being hauled to the fill Sta. 362-366. A HD-19 push cat was assisting in loading.

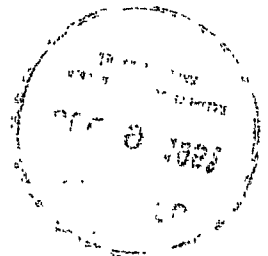

3 men were clearing at Sta. 1914.

Handwritten notes and checkmarks: ① ✓, ② ✓, ③ ✓, ④ ✓

4. COMMENTS AND RECOMMENDATIONS:

Permanent frost encountered in the excavation between Stations 437 and 500 has complicated the contractors operation. Due to the steep side slopes he has been unable to move the thawed layer daily as is necessary to promote thawing. He has shipped in a compressor and plans to drill and shoot a bench along each cut. This will provide the footing necessary to operate his equipment.

Colonel John R. Noyes  
Commissioner of Roads  
for Alaska  
Alaska Road Commission  
Juneau, Alaska

Dear Colonel Noyes:

Five bids were received September 20, 1950 for construction of Alaska Highway, Section A, Bl, as follows:

Rogers Construction Co. & Babler Bros.	\$1,884,391.00	
C. F. Lytle Company and Green Construction Company	1,896,354.00	<i>← OK for acceptance gws</i>
Stock and Grove	1,919,583.00	
McLaughlin, Inc.	2,044,437.00	
S. Birch & Sons and Morrison-Knudsen Company	2,190,029.50	
Engineer's Estimate	2,217,594.00	

In view of the competition received and the fact that all bids were below the engineer's estimate, acceptance of the bid and award of the contract to Rogers Construction Company and Babler Bros. is recommended.

We would appreciate your advice of acceptance of the low bid, and the authority to notify the low bidder of award of the contract.

There is enclosed a letter prepared for the signature of Mr. Ghiglione, advising Rogers Construction Company and Babler Bros. of the acceptance of their bid.

Yours very truly,

*[Signature]*

Enclosed is Progress Report for the week ending November 12, 1949 covering the interior projects as well as the projects on Turnagain Arm.

You will note that the percentages for Richardson B have been changed from the previous reports although no actual work was done in the period. Percentages shown previously were conservative but those shown now reflect the actual condition of the project at the time of winter shutdown. The only projects remaining active are those on Turnagain Arm.

Oct. 26, 1948.

GLENN HIGHWAY CONSTRUCTION SEC. A

TO: ALASKA ROAD COMMISSION

FROM: John E. Haapala, Res. Engr., Eklutna, Alaska.

Monthly Progress Report as of October 26, 1948. Work begun: Oct. 4, 1948.

Col. N
INT
WAG
AMT
ELR

<u>ITEM No.</u>	<u>ITEM</u>	<u>% Complete</u>
20 (1)	Clearing and Grubbing	20
24 (1)	Unclassified Excavation	1.5
26 (1)	Unc'l. Exc. for Borrow	10
28 (2)	Cu. Yd. Mi. Overhaul, Borrow	20

Work on other Contract Items has not been performed to date.

Traffic was stalled on the existing 8% grades on both the north and south approaches to the new Eagle River bridge during the snow storm of Sunday evening, Oct. 24, 1948.

Approximately 20 cars were in difficulties on the south side grade in the period from 6:30 P.M. to 8:30 P.M. by personal observation. Chains were necessary on the grades for safe travel through the following day.

No inconvenience to traffic was reported in the areas under construction.

No reports on the summits available.
