

# MEMORANDUM

# State of Alaska

TO: Dick Chitty  
Right of Way Director

DATE: April 14, 1971

FILE NO: 00-1920

SUBJECT: Meeting in Anchorage with  
Curt McVee of the BLM

FROM: B. A. Campbell  
Commissioner of Highways

I met with Mr. McVee when I was in Anchorage on Thursday, April 8, and discussed the problem of right-of-way through BLM in remote areas. Of particular interest in our discussion was the problem that we frequently encounter whereby we have an existing right-of-way as established by a PLO. During the relocation of the project to make minor variations from the existing centerline which cause little sliver changes in the right-of-way granted under the PLO.

Mr. McVee indicated that it would be satisfactory for us to show only the right-of-way as related to the new centerline where the right-of-way traversed only public lands and no private surveys were involved. In our transmittal letter we need simply to state that this is the right -of-way the State Department of Highways claims under the applicable PLO.
