• Project No. F-044-1 (6) MULDOON ROAD Parcels No. 6, 7 and 10

STATE vs. C.B.S. REAL ESTATE CO., INC., et al Civil Action No. 75-7660 C

Attached is a JUDGMENT and FINDINGS OF FACT AND CONCLUSIONS OF LAW filed February 9, 1975 in the Trial Courts and relating to the above project.

Please note how existing right of way was determined: the entry date does not establish and does not segregate the land and would not preclude the P.L.O. from applying.

In addition, it would appear that we should adjust our thinking and realign rights of way affected by the P.L.O. Rights of way should not be establaished by entry date but by the patent date on homesteads and the date purchased on homesites, small tracts, etc., as it relates to public domain and utilized by the Federal Government only.

further norrowed to fixing the width of the right-of-way casement across Parcel Nos. 7 and 10 that the United States reserved unto itself or otherwise acquired r existing laws as of the date of conveyance to the State of Alaska. In turn, the above question raises two specific alternative legal questions:

1) At the time of construction had the lands involved become other than "public lands" within the meaning of Public Land Order No. 601, dated August 10, 1949, so as to preclude its application prescribing widths for rights of way of local roads?

If so, what width right of way did the United 2) States have at the time of conveyance to the State of Alaska?

FINDINGS OF FACT

At all times relevant in these proceedings the United States was, inter alia, the sovereign of the soil, the landowner, the road builder, the subdivider, the granter to both the State and the original landowner-grantee and the public recorder. Moreover, all pertinent actions of the United States were taken by the Secretary of Interior or through his dolegated authority to subordinate agencies within the department, the Alaska Road Commission and the Bureau of Land Management. (Congress transferred the highway function to Department of Commerce in 1956)

On May 17, 1949, the Regional Administrator, Bureau of Land Management, determined that, offective September 21, 1949, certain described public lands in Section 13, inter alia, were suitable for disposition as small tracts for cabin and home sites by lease and sale pursuant to the provisions of the popularly called Small Tract Act of 1938, as amended, and extended to Alaska, currently codified in 43 U.S.C.682a-d, and caused it to be published in the Federal Register (Exhibit 3).

Fourteen days later a petition dated June 1, 1949, requested the Alaska Road Commission to construct a system of farm roads to include Huldcon Road substantially as sho in green on Exhibit 1.

On August 10, 1949, a secretarial directive
published in the Federal Register as Public Land Order No.
601 fixed uniform right-of-way widths for all categories of
highways on public lands in Alaska, the minimum width being
for local roads fixed at 100 feet, fifty feet each side of
the center line.

Late in the summer of 1949, the proposed location of Muldoon Road was field inspected; the center line was surveyed and staked by the Alaska Road Commission the following spring, 1950, after breakup (Exhibit 9).

On August 18, 1949 and Suptember 22, 1949, leases
 were executed with conditional provisions creating a preferred right or option to purchase, at a stipulated price, the tracts comprising Parcel Nos. 7 and 10, respectively (Exhibits 6 and 7).

24

22

On May 1, 1950, the Bureau of Land Management issued instructions to its cadastral surveyor providing for. subdivisions of certain public lands, including the subdivision in Section 13. In addition to reciting the reasons for the subdivisions, the instructions required the cadastral surveyor to survey the center lines of the roads and highways constructed by the Department of Interior, specifically noting the widths of the rights-of-way for local roads fixed by Public Land Order No. 601, at 100 feet, 50 feet on each side of the center line (Exhibit 5). The subdivision plat (Exhibit 10) shows by dash lines a right-of-way width of 100 feet for Muldoon Road with Parcels 7 and 110 marked thereon in open courts.

35

33

Buldoon Road was constructed during the construction Season of 1950 by the Alaska Road Commission and was substantially completed by August 8, 1950 (Exhibit 7)

On September 21, 1951 the stipulated purchase price was paid for Parcel 7 and in due course patent thereto was .

1 issued on March 31, 1952; on April 10, 1951 the stipulated purchase price for Parcel 10 was paid and patent issued . thereon in due course on June 13, 1951. (Exhibits 6 and 7). Huldoon Road, as originally constructed, was a local road within the meaning of Public Land Order 601.

CONCLUSIONS OF LAW

14 15 It is fundamental that Article IV, § 3, Clause 2 11 of the United States Constitution vests in the Congress 12 alone the authority to determine under what terms and conditions 13 Heroperty of the United States may be disposed of. The small tract act, like the earlier enacted homestead laws, provides 15 the congressional authority and prerequisites for disposition 17 of public lands of the United States to qualified persons. 13 The primary difference between the two laws relate, to size and a simplified, transferable method of proving compliance 17 25 with land use and improvement prerequisites to acquire 21 title. Implementing small tract regulations of the Secretary 22 of Interior, 43 CFR 257 (1949 Edition) prescribe at subsection 23 257.2(c): CULTAITTICNT OF LAW CONST OF THE ATTENTING CONTRACT LATTORNEY, MICHARL STORM CONTRACTOR STORMACL, MANNER THEORY OF ATTENTING, MANNER THEORY OF ATTENTING, MANNER 25 No direct sale will be made of lands under the (c) Use and improvement of the land under lease act. 15 will be required before it will be; sold. Leases of lands which are classified for lease and sale <u>.</u>... will contain an option permitting the lessee to purchase as provided in § 257.10. ... 27 At this point two matters should be noted as _`` The unofficial, 21 "working" subdivision may mentioned in paragraph 8 of the 1 Small tract notice published in the Federal Register (Emhibit

in 1950 (Exhibit 11 during construction of Muldoon Road depicts 100 feet of right of way, and certainly would have been used to describe each marcel, legally incorporating the 3 plat directly by reference into the patent, except that it 5 was not then prepared and filed Instead each tract is 4 described by aliquot parts in the patent with the later filed official subdivision plat indirectly incorporated by reference, as follows:

> The area described contains 2.50 acres according to the Official Plat of the Survey of the said Land, on file in the Bureau of Land Management.

It is unnecessary for proper decision, however, to draw any 11 12 specific conclusion from the foregoing if private property rights against the United States had not vested when Muldoon I Road was constructed

A century ago, the United States Supreme Court twice considered and fixed the time private property rights vested in public land against the United States. The clear rule resulting from the opinions in Frisby v. Whitney, also called the Yosemite Valley Case, 9 Wall. 187, 19 Law. Ed. 668 (1370), and Hutchings v. Lowe, 82 U.S. 77, 21 Law. Ed. 32 (1373) is that a gualified person seeking to obtain title. to public land of the United States under its public land laws acquires no vested interest in such land against the United States until he complies with all the statutory prerequisites for patent, including payment of the sale price, if applicable

In the latter Yosemite opinion the Court restated its carlier decision, in pertinent part:

> ... The power of regulation and disposition, conferred upon Congress by the Constitution, only ceases when all the preliminary acts prescribed by those laws for the acquisition of the title, including the payment of the price of the land, have been performed by the settler. When these procequisites have been complied with, the settler for the first time anguires a vested interest in the premises occupied by him, of which he cannot be subsequently deprived. ...

deprive Congress of the power to reserve such lands from sale for public uses of the United States, though needed for arsenals, fortifications, lighthouses, hospitals, customhouses, court-houses, or for any other of the numerous public purposes for which property is used by the Government. It would require very clear language in the Acts of Congress before any intention thus to place the public lands of the United States beyond its control by more settlement of a party, with a declared intention to purchase, could be attributed to its Tegislation.

11 The Supreme Court reiterated:

The decision in Frisbic v. Whitney was pronounced by a unanimous court, and subsequent reflection has satisfied us of its entire soundness. The construction there given to the pre-emption laws is, as there stated, in accordance with the construction uniformly given by that department of the Government, to which the administration of the land laws is confided, and by the chief law officers of the Government to whom that department has applied for advice on the subject. It is the only construction which preserves a wise control in the Government over the public lands...

In the instant case, the subdivided lands in section 13 as of August 10, 1949, the effective date of PLO 21

601, were clearly public lands of the United States. Λ

CEPANTIAENT OF LAVY OFFICE OF THE ATTOMUCY CELLAAL ANCFORASE DAALCH, HIGHVAY SECTION ANCFORASE DAALCH, HIGHVAY SECTION CO. ST. LUITE 200, ANCHOAASE, ALASKA 89301 PHONE 230-4940

local road later constructed thereon by the Department of Interior would have a right-of-way width of 100 feet unless the lands at the time of construction were no longer public lands of the United States. Stated differently, the subdivided tracts would not be public lands of the United States if at the time of construction of the local road the lessees of parcels 7 and 10 had acquired a vested interest in the property as against the United States. Under the federal rule established in <u>Prisby</u> and <u>Mutchings</u>, the last prerequisite for patent of small tracts was the payment of the purchase

price 43 CFR 257.14(e) provides:

(c) If the applicant has paid the full purchase price and otherwise complied with the foregoing and no objection appears, cash certificate will be issued by the manager, to be followed by patent.

Both parcels were paid for in 1951, at which time private property rights against the United States became vested. 1 This conclusion is entirely consistent with and undoubtedly provides the legal basis for a standard provision 5 of the lease itself. The United States and the original lessee 4 specifically understood and agreed that nothing contained in 7 the lease "shall restrict the acquistion, granting, or use of permits or rights of way under existing laws." .9 For these reasons, the Court concludes that the 16 right of way width provision of PLO 601 applied to, and set 11 12 the width of Muldoon Road as a local road at the time it was laid out and constructed in 1950 across parcels 7 and 10. 13 14 This conclusion makes it unnecessary to consider alternative 15 missuas 16 Accordingly, the Court fixes the width of the 17 existing Muldoon Road right-of-way easement owned by the 13 plaintiff State of Alaska as follows: Parcel 7: The easterly 50 feet as described and 17 platted in Schedules "B" and "B-1" of the 20 complaint containing 11,847 square feet, more or less. 21 Parcel 10: The westerly 50 feet as described and 22 platted in Schedules "C" and "C-1" of the complaint containing 7,497 square 23 fect, more or less. 21 DONE at Anchorage, Alas Fhi < day of 25 1976 6000 26 SUPERIOR COURT 27 trate in territy permaterized of the choice sint is beguly estimated and of the system Sav - Standing 23 20 62.
