

CERTIFICATE OF RIGHT-OF-WAY DESCRIPTION STANDARD

GRANTOR AND FOREST:

ROAD NAME AND NUMBER:

PROJECT NUMBER:

I certify that use of the United States Geological Survey map or aerial photo as a part of the description in the right-of-way easement deed in the subject project is consistent with the value of the land, the legal rights and interests necessary to accomplish the objective of the acquisition, the value of the proposed improvements to be constructed in the easement area, the risk of loss, and the possibility of trespass that could be created by property lines not being marked to standard. The road covered by the right-of-way easement acquisition is in place, no dispute over ownership of the land traversed by the right-of-way exists, and use of the map or aerial photo in the deed description will in no way interfere with the use of the right-of-way of National Forest lands served by the right-of-way. There will be no interference with the purposes for which such lands were acquired, nor will such use materially diminish their value.
